

# Harmony<sup>®</sup> Extra SG Herbicide

with TotalSol<sup>®</sup> soluble granules

## Don't let winter annuals get ahead of your wheat crop this fall.

### Fall applied Harmony<sup>®</sup> Extra SG herbicide delivers:

- Reliable burndown of common chickweed, henbit, pennycress, shepherd's purse and more than 60 other broadleaf weed species.
- Weed control before weeds go to seed, so you'll end the season with cleaner fields, higher-quality straw and fewer weeds to fight in the future.
- The ability to be tank mixed with pyrethroid insecticides used to control aphids that transmit viruses in the fall.
- One fall application — Two passes may be required for fields that have wild garlic or other tough-to-control broadleaf weeds that germinate over an extended period of time.

### MIDWEST

#### RATE RECOMMENDATION

##### Fall one-pass program

Harmony Extra SG herbicide 0.6–0.75 oz./A + NIS.

##### Two-pass program

Fall application Harmony Extra SG herbicide 0.6–0.75\* oz./A + NIS.

#### Followed by spring application

Harmony Extra SG herbicide 0.6–0.9\* oz./A + 2,4-D LVE (as needed) + NIS.

\* Do not apply a total of more than 1.5 oz./A of Harmony Extra SG herbicide per season.

#### Application information

- Make applications after the wheat crop is in the two-leaf stage, but before the flag leaf is visible.
- Do not apply 2,4-D LVE to wheat before tillering or after the joint stage.
