

# Elevest<sup>®</sup> Insect Control

Powered by Rynaxypyr<sup>®</sup> active

## SWEET CORN

### Product Information:

---

Knock down a broad spectrum of challenging pests with the lasting residual control of Elevest<sup>®</sup> insect control. By optimizing the ratio of ingredients Rynaxypyr<sup>®</sup> active and bifenthrin, growers get better overall control. This convenient, fully loaded combination is an excellent option for ear protection during silking as part of your IPM program to protect the ear.

Elevest insect control is a high-quality formulation that is rainfast when dry. It provides excellent compatibility with commonly used tank-mix partners labeled for use on sweet corn.

### Quick Facts:

---

- Provides excellent control of a broad spectrum of more than 30 pests, including corn earworms and stink bugs that challenge sweet corn yields and quality.
- Optimized ratio of industry-leading Rynaxypyr<sup>®</sup> active for Lepidopteran pests plus the best performing stink bug pyrethroid, bifenthrin (Group 3A) to set the industry standard for overall ear protection.
- Labeled with a one-day preharvest interval.
- Broad-spectrum insect control is an excellent fit in IPM systems to combat multiple insect pests occurring simultaneously.
- Provides fast knockdown of targeted pests.
- Rainfast when dry.

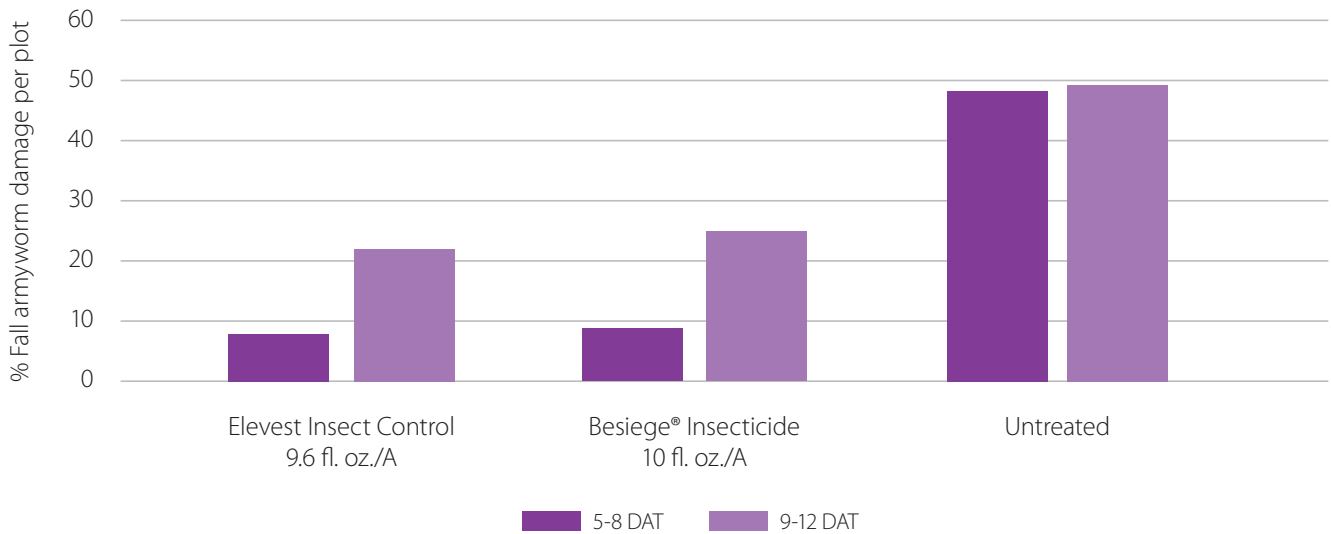

TARGET PESTS	APPLICATION RATE (fl. oz./A)	PHI (Days)	REI (Hours)
Corn earworm Armyworms	5.6-9.6	1	12
Stink bugs*	4.8-9.6		

\*Refer to label for rate range by stink bug species being targeted.

### Efficacy of Elevest<sup>®</sup> insect control on fall armyworms (*Spodoptera frugiperda*) in sweet corn.

Mean across seven trials (5-8 DAT) or four trials (9-14 DAT) conducted in 2019 in Florida and Georgia.
