

# FIGHT YIELD ROBBING INFESTATIONS WITH ZERO DOUBT.

## WHEAT THREAT ALERT: TRUE ARMYWORMS

**Mustang® Maxx insecticide from FMC is here for you.**

It doesn't take long for insects to do costly damage to your wheat season. Mustang® Maxx insecticide from FMC protects your wheat fields with pyrethroid chemistry that is not only proven but enhanced to provide one of the broadest spectrums of insect control on the market. That's especially important right now with recent reports of local pressure from true armyworms. Mustang Maxx insecticide has a rate range of 1.76 - 4.0 fl. oz. per acre for control of true armyworms.

**Get better yields and more dollars per acre.**

Mustang Maxx insecticide brings the pyrethroid difference to your wheat fields.

- Starts working on contact and ingestion with strong residual control of the widest range of insects.
- Is a great tank-mix partner with fungicides, herbicides or spray adjuvants for greater efficiency and ease of application.
- State-of-the-art technology increases the spectrum and length of control for more value from your insecticide dollar.
