# Deadmag<sup>®</sup> Blowfly Strike Dressing Fluid

Well established and proven product for the eradication and protection against sheep blowfly strike.

**Flystrike affects up to 80% of merino wool-producing sheep flocks in Australia. Infestations can cost the industry up to \$173 million annually in stock loss, productivity loss, and control measures (AWI 2019).**

Graziers' know that during humid summer months monitoring of sheep for fly strike is needed. The main purpose of an insecticidal dressing fluid is fast activity on maggots followed by protection of the healing wound from fly strike. The longer residual activity the greater comfort graziers' will have when monitoring their flock post-treatment.

Deadmag<sup>®</sup> Blowfly stike dressing fluid is an organophosphate insecticide formulated for Australian conditions. During the warm summer months it will provide quick eradication with 4-8 hours by working on the nervous system of the blowfly followed by residual activity for up to 21 days.

**Active Constituent:** 14.4 g/L PROPETAMPHOS (an anti-cholinesterase compound) 400 g/L PARADICHLOROBENZENE

**Solvent:** 510 g/L LIQUID HYDROCARBONS

## Directions for use

Shear struck wool and a 5cm barrier of clean wool around the site to remove maggots before applying Deadmag<sup>®</sup> to the affected area.

Pest	Treatment	Rate
Sheep Blowfly	Dressing for treatment	Uses 23 mLs per L water 1:40 mix ratio
<b>Withholding periods</b>	Meat: 14 Days Do not use less than 14 days before slaughter for human consumption. Wool: 2 Months Do not use less than 2 months before shearing. Milk: Do not use on lactating ewes where milk or milk products may be used for human consumption.	
<b>Dangerous Goods Rating</b>	Non DG – convenient for storage and transport.	
<b>Residual control</b>	Will last UP TO 21 DAYS after treatment to prevent fresh strikes.	
<b>Pack size</b>	1L bottles only.	

As a guide, if applying on average one litre mix per animal, the pack will treat approximately 40 animals (subject to size of the fly struck area). Cost is approximately \$2.50 per animal based on one litre of wash mix per animal.
