# Get 2-in-1 pre-emergent protection against grassy and broadleaf weeds

## What is Authority<sup>®</sup> Supreme herbicide?

Authority<sup>®</sup> Supreme herbicide delivers consistent, extended pre-emergent control of many grassy and broadleaf weeds in front of field peas, chickpeas and soybeans. By combining Group 14 and 15 modes of action, it also provides highly effective resistance management. Authority<sup>®</sup> Supreme herbicide can be tank-mixed with glyphosate.

## How does Authority<sup>®</sup> Supreme herbicide help my farm business?

**Exceptional early weed removal.** Authority<sup>®</sup> Supreme herbicide's extended pre-emergent control of many tough grassy and broadleaf weeds helps you to achieve a clean field at a critical point in the crop's development.

### Quick facts:

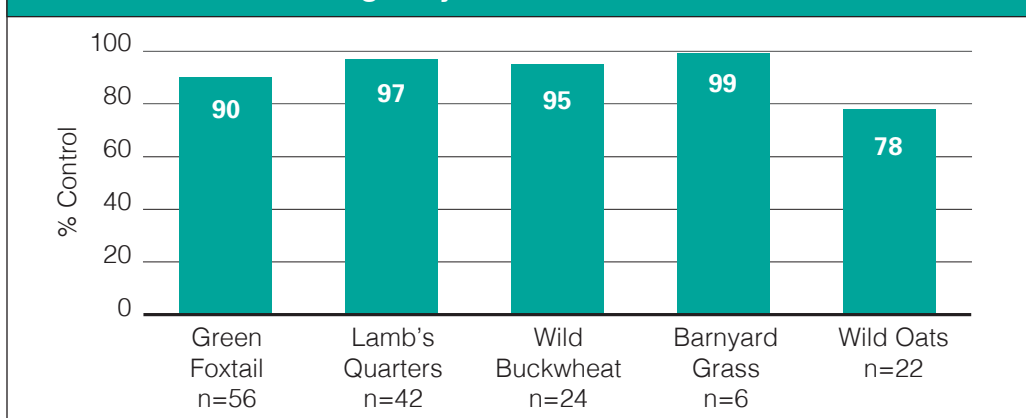

**Water volume:**  
 10 gal/ac (100 L/ha)

**Package size:**  
 2 x 8L jugs per case

**Activation requirement:**  
 15 to 25 mm (1/2") of rainfall

Can be tank-mixed with glyphosate.

### Consistent grassy and broadleaf weed control

**Multiple modes of action for resistance management.** Because Authority<sup>®</sup> Supreme herbicide contains modes of action from Group 14 and 15, it's a welcome tool for growers looking to diversify modes of action to avoid resistance.

**Flexibility on timing and rate.** Authority<sup>®</sup> Supreme herbicide can be applied before seeding or up to three days after seeding – with or without glyphosate. Apply with glyphosate if weeds are actively growing. Each 8L jug treats 33 or 40 acres, depending on timing and soil characteristics, so you can choose the rate that suits your soil type and/or weed spectrum.

**Convenient liquid formulation.** An easy-to-use liquid formulation gets you out in the field quicker – a real benefit at times when every hour counts.

33 ac/jug Authority<sup>®</sup> Supreme herbicide  
+ ½ L REL glyphosate;  
26 DAT; Portage, Manitoba

33 ac/jug Authority<sup>®</sup> Supreme herbicide  
+ ½ L REL glyphosate;  
98 DAT; Portage, Manitoba

½ L REL glyphosate;  
98 DAT; Portage, Manitoba

## What rate should you use?

Authority<sup>®</sup> Supreme herbicide is applied at 33 or 40 acres per jug rate, depending on your Organic Matter (O.M.) percentage. Those with lower O.M. will have extended control at 40 acres/jug, while those with a higher O.M. will want to increase the rate to 33 acres/jug to achieve extended control.

## How does Authority<sup>®</sup> Supreme herbicide affect my crop rotation?

Crops	Rotation Interval
Field peas, soybeans, chickpeas	Apply any time
Winter wheat	4 months
Barley, canola, field corn, mustard, oats, sunflower, wheat (spring & durum)	12 months
Lentils	24 months
Sugar beets	36 months

### Crops

- Field peas
- Chickpeas
- Soybeans

### Weeds

#### Grassy weeds

- Green foxtail
- Yellow foxtail
- Giant foxtail
- Downy brome
- Japanese brome
- Barnyard grass
- Crabgrass
- Witchgrass
- Wild oats<sup>1</sup>

#### Broadleaf weeds

- Redroot pigweed
- Green pigweed
- Cleavers
- Common waterhemp
- Stinkweed
- Cow cockle
- Kochia
- Lamb's-quarters
- Wild buckwheat
- Common ragweed<sup>1</sup>
- Wild mustard<sup>1</sup>
