# EXPRESS<sup>®</sup> PRO HERBICIDE

## BURNOFF

# Professional-strength burnoff with extended control of your toughest broadleaf weeds.

## What is Express<sup>®</sup> PRO herbicide?

Express<sup>®</sup> PRO herbicide, added to glyphosate, provides extended activity on key broadleaf weeds such as cleavers, dandelion, flixweed, narrow-leaved hawk's-beard, stinkweed, volunteer canola and wild buckwheat.

## How does Express<sup>®</sup> PRO herbicide help my farm business?

- **A longer-lasting burnoff.** Express<sup>®</sup> PRO herbicide controls key broadleaf weeds for an extended period of up to 15 days, including weeds that often escape an application of glyphosate alone.
- **Effective resistance management.** Express<sup>®</sup> PRO herbicide provides a powerful second mode of action with your glyphosate.
- **Systemic activity within the plant.** Just like glyphosate, controlling weeds all the way down to the root so they can't grow back.
- **Can be tank-mixed with any glyphosate.**

### Quick facts:

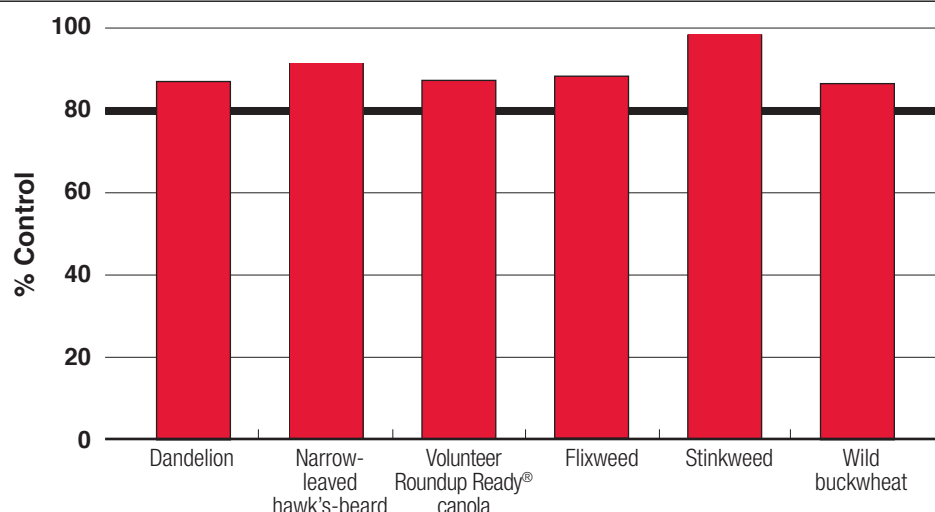

Must be tank-mixed with glyphosate

**Water volume:**  
5 gal/ac (50 L/ha)

**Packaging:**  
One (1) jug treats 80 acres

**Powered by Solumax<sup>®</sup> Technology:**  
Soluble granules that dissolve completely into solution, for fast and easy sprayer cleanout, efficient plant absorption and consistent weed control results.

### Express<sup>®</sup> PRO herbicide Pre-Seed Weed Control

■ Express<sup>®</sup> PRO herbicide + 1/2 L glyphosate Equivalent

Source: Internal Research Trials 2005-2007. Average ratings 21-35 days after application.

## How can I use Express® PRO herbicide with glyphosate?

Pre-seed burnoff. Wait a minimum of 24 hours after the application of Express® PRO herbicide and glyphosate before planting wheat (spring, durum, winter) or barley.

**Chemfallow.** Allow at least 10 days after treatment before tillage.

**Post-harvest burnoff.** Apply to fields where wheat, barley or oats will be seeded next spring. Note: Limit to one application of Express® PRO herbicide per season.

## How effective is Express® PRO herbicide on my toughest broadleaf weeds?

See for yourself. Check out the Express® PRO herbicide video on our YouTube channel, FMC Ag Canada.

### Express® PRO herbicide plus glyphosate

Untreated

1 L glyphosate

Express® PRO herbicide plus  
0.5 L glyphosate equivalent

### Express® PRO herbicide Plus glyphosate

Untreated

Glyphosate plus  
Express® PRO herbicide

Glyphosate plus Heat®

Source: Controlled growth room environment, 18 days after application, Dr. François Tardif, Peter Smith, University of Guelph, Plant Agriculture Department, June 2013.

## Crops:

### 24 hours after application:

- Spring wheat
- Durum wheat
- Winter wheat
- Barley

10 Months: Canola, faba beans, field corn, flax, peas and soybeans

22 Months: Lentils

Oats may be seeded anytime the following season.

Fields treated with a post-harvest application of Express® PRO herbicide in the fall may be seeded in the spring to wheat (spring or durum), barley, oats or fields may be summerfallowed.

## Broadleaf control:

(Express® PRO herbicide plus 0.5 L/ac glyphosate equivalent<sup>†</sup>)

- Canada fleabane
- Canada thistle<sup>†</sup>
- Chickweed
- Cleavers<sup>‡</sup>
- Common ragweed
- Cow cockle
- Dandelion<sup>‡</sup>
- Downy brome
- Flixweed
- Giant foxtail
- Green foxtail
- Hemp-nettle
- Kochia
- Lady's-thumb
- Lamb's-quarters
- Narrow-leaved hawk's-beard<sup>‡</sup>
- Night-flowering catchfly<sup>†</sup>
- Persian darnel
- Redroot pigweed
- Russian thistle
- Scentless chamomile
- Stinkweed
- Volunteer barley
- Volunteer canola<sup>‡\*</sup> (including glyphosate tolerant)
- Volunteer barley
- Volunteer flax
- Volunteer wheat
- White cockle
- Wild buckwheat
- Wild mustard
- Wild oats

<sup>†</sup>Original 356 g/L formulation.

<sup>‡</sup>Suppression

<sup>‡</sup>Extended Control.

<sup>‡\*</sup>Will not provide extended control of Clearfield® canola.
