

CUSTOMIZED BROADLEAF WEED CONTROL.

PrecisionPac® PP-2525 herbicide is your ideal solution for in-crop weed control in spring, winter and durum wheat and barley. It controls a wide spectrum of weeds including narrow-leaved hawk's-beard, wild buckwheat, hemp-nettle, redroot pigweed, cow cockle and volunteer canola*. For oats, add MCPA Ester.

PrecisionPac® PP-2525 herbicide is perfectly suited for all major soil zones, is easy on the crop, and offers excellent tank-mix and re-cropping flexibility.

Dispensed in easy-to-handle, premeasured pouches for your exact weed spectrum and sprayer size, you buy only the amount you need. That means customized, top-performing weed control, great value and no leftovers to store!

Wild Buckwheat Control

Refer to the PrecisionPac® PP-2525 herbicide label for further details.

The flexibility of PrecisionPac® herbicides gives you the power to fully customize your weed control.

PRECISIONPAC
APPLICATION INNOVATION

PP-2525 is gentle on crops. Tough on the toughest weeds.

PRECISIONPAC® PP-2525 Herbicide

PrecisionPac® PP-2525 herbicide delivers powerful broadleaf weed control while being gentle on crops.

FMC

Major Weeds Controlled

- Annual smartweed
- Cleavers¹
- Common chickweed
- **Cow cockle**
- Dandelion²
- Flixweed
- Hemp-nettle
- Kochia¹
- Lamb's-quarters
- **Narrow-leaved hawk's-beard**
- **Night-flowering catchfly**
- Perennial sow thistle
- Redroot pigweed
- Round-leaved mallow¹
- Russian thistle
- Scentless chamomile²
- Stinkweed
- Stork's bill¹
- **NEW!** Shepherd's purse
- Volunteer canola*
- Volunteer flax¹
- White cockle²
- Wild buckwheat
- Wild mustard

Weeds Suppressed

- Canada thistle (<15 cm)

¹ When tank-mixed with Perimeter® II Herbicide

² When tank-mixed with MCPA Ester

* PP-2525 herbicide alone will not control imazethapyr tolerant canola varieties (e.g. Clearfield* varieties or other varieties with the Pursuit Smart* trait)

Crops:

Wheat (spring, durum and winter), barley and oats with the addition of MCPA Ester

Timing:

Wheat (spring, durum and winter) and barley: 2-leaf to just before the flag leaf.

Oats with the addition of MCPA Ester: 3-leaf to just before the flag leaf.

Crop Rotation:

Two (2) months: Alfalfa, canola, flax and lentils.
- Following growing season: all crops.

Application Information

Rates: 12 grams/ac (30 grams/ha)

Acres per grower bag:

Minimum: 20 acres; Maximum: 320 acres

Surfactant: Add a registered surfactant such as Agral® 90, Ag-Surf®, Ag-Surf® II, Citowett® Plus, Enhance, HiActivate Non-ionic Liquid Spreader/Activator, Liberate Adjuvant or Super Spreader Adjuvant at 2 L per 1000 L spray solution. When tank-mixing with a grass herbicide, use the surfactant provided with the product.

Water Volume: Minimum 22 L/ac (5 imp. gal/ac).

Rainfastness: One (1) hour.

Mixing Instructions:

Ensure that PrecisionPac® PP-2525 herbicide is fully dissolved before adding tank-mix partners.

Registered and Supported Tank Mix Options:

GP Herbicide: Now available as an all-in-one blend. Ask about PrecisionPac® CS-100-2525 herbicide.

2,4-D Ester 700LV: Enhanced broadleaf weed control.

Axial®: One-pass grass and broadleaf weed control in spring wheat and barley.

Banvel® II: Extended broadleaf weed control plus Group 2-resistant kochia.

Everest® 2.0: One-pass grass and broadleaf weed control in spring wheat.

Clodinafop: One-pass grass and broadleaf weed control in spring and durum wheat.

Perimeter® II: For added broadleaf control including cleavers and kochia.

Puma® Advance: One-pass grass and broadleaf weed control.

Simplicity™ GoDri™: One-pass grass and broadleaf weed control in spring and durum wheat.

Varro®: One-pass grass and broadleaf weed control in spring and durum wheat.
