

# TRAVALLAS

HERBICIDE

IN-CROP

## Heavyweight weed control, lightweight package

### What is Travallas® herbicide?

Travallas herbicide is one-of-a-kind, liquid in-crop herbicide that delivers powerful control of hard-to-kill broadleaf weeds in key cereal crops.

### How does Travallas herbicide help my farm business?

Outstanding activity on your toughest weeds. Travallas herbicide provides powerful performance on hard-to-kill weeds such as Canada thistle<sup>1</sup>, cleavers, narrow-leaved hawk's-beard, wild buckwheat, dandelion, hemp-nettle and kochia. It is especially effective on large weeds, such as controlling wild buckwheat from the 1-leaf to 8-leaf stage. Despite its potent activity, crop safety is assured.

#### Quick facts:

**Application timing:**

2-leaf to flag-leaf

**Water volume:**

5 gal/ac (55 L/ha)

**Packaging:**

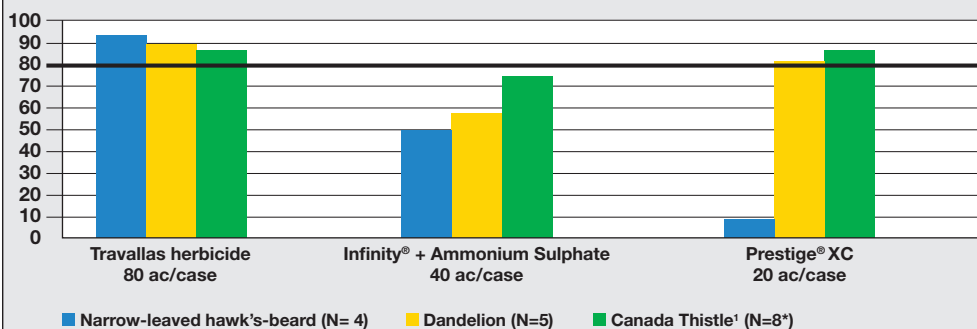

One 8 L jug treats 40 acres (202 mL/ac)

**Rainfastness:**

Two (2) hours

### Travallas herbicide vs competitors on tough weeds

% weed control

Source: Results are from Internal research trials, 42-56 days after application in 2012-2013

\* Prestige® had a N value of 5 trials on Canada Thistle

<sup>1</sup> Travallas® herbicide provides top growth control on Canada Thistle

**Easy to use.** A low use rate and simple use pattern with a built-in adjuvant save you time and money. It's like bulk in a jug.

**Great for resistance management.** With three active ingredients from two different herbicide Groups (2 and 4), Travallas herbicide has the power to take down the toughest broadleaf weeds while managing the threat of weed resistance.

**Wide window of application.** Travallas herbicide can be sprayed from the 2-leaf to the flag-leaf stage of growth.

**Valuable re-cropping flexibility.** The following crops may be seeded 10 months after application: canola, dry beans, fababeans, field corn, flax, lentils, oats, peas, soybeans, spring wheat (including durum), winter wheat and spring barley.

## When and how is Travallas herbicide applied?

Travallas herbicide has a wide window of application: from the 2-leaf stage to the flag-leaf stage of growth. One 8 L jug treats 40 acres. Do not use Travallas herbicide in the same season as an Express® PRO herbicide application.

## Which grass herbicides can be tank-mixed with Travallas herbicide?

- Axial®
- Everest® 3.0/Sierra® 3.0
- MCPA Ester®
- Traxos®
- GP Herbicide
- Clodinafop
- Puma® Advance
- Simplicity™ brands
- Varro®

## Crops

- Barley
- Wheat (durum, spring, winter)

## Weeds

- Annual smartweed (green smartweed, lady's thumb)
- Annual sow thistle<sup>2</sup>
- Canada thistle<sup>1</sup> (top growth control)
- Chickweed
- Cleavers (1-up to 9 whorl)
- Corn spurry
- Cow cockle
- Dandelion (spring or fall rosettes up to 25 cm in diameter)
- Flixweed
- Hemp-nettle (up to 8 leaf)
- Kochia (including Group 2-resistant)
- Lamb's-quarters
- Narrow-leaved hawk's-beard
- Night-flowering catchfly
- Redroot pigweed
- Russian thistle
- Scentless chamomile (up to 10 cm)
- Shepherd's purse (up to 20 cm)
- Stinkweed
- Stork's-bill
- Volunteer canola\*
- Volunteer flax
- White cockle
- Wild buckwheat (1-8 leaf)
- Wild mustard

<sup>1</sup>Suppression.

<sup>2</sup>When mixed with MCPA

\*Excluding Clearfield® varieties or other varieties with the Pursuit® Smart trait.
