# Pre-emergent protection against grassy and broadleaf weeds in soybeans

## What is Authority<sup>®</sup> Supreme herbicide?

Authority<sup>®</sup> Supreme herbicide delivers consistent, long-lasting pre-emergent control of many grassy and broadleaf weeds in IP and herbicide-tolerant soybeans. By combining Group 14 and 15 modes of action, it also provides highly effective resistance management.

## How does Authority<sup>®</sup> Supreme herbicide help my farm business?

**Effective early weed removal.** Authority<sup>®</sup> Supreme herbicide's extended pre-emergent control of many tough grassy and broadleaf weeds contributes to cleaner fields to get your soybeans off to a great start.

**Ideal for IP and HT soybeans.** Authority<sup>®</sup> Supreme herbicide fits both identity preserved (IP) and herbicide-tolerant (HT) systems, which streamlines and simplifies your soybean program decision-making.

**Manages weed resistance two ways.** The Group 14 and 15 action of Authority<sup>®</sup> Supreme herbicide controls weeds resistant to Groups 2, 5 and 9, and helps slow the development of resistant weeds in the future.

**Three rates to suit your soybeans, soil type and weed pressures.** Authority<sup>®</sup> Supreme herbicide offers a set-up rate and two extended weed control rates (depending on soil type). For IP soybeans, the extended control rate delivers maximum pre-emergent performance on grass and broadleaf weeds, including tough customers like waterhemp. For HT soybeans, the set-up rate controls resistant weeds and takes the pressure off your in-crop glyphosate application. Go with the extended control rate when weed pressure is heavier. See the rate chart on the reverse side.

**Easy to use.** A convenient liquid formulation gets you spray-ready in less time, with less hassle.

### Quick facts:

**Water volume:**  
 10 gal/ac (100 L/ha)

**Package size:**  
 2 x 8L jugs per case

**Rate:**  
 33 to 50 acres per jug

**Activation requirement:**  
 15 to 25 mm (1/2") of rainfall

## What rate should I use?

Authority® Supreme herbicide offers three rates, as shown in the table below. Choose what's right for your soybeans, your soil type and your weed pressure.

	Rate mL/ac	Acres/jug	Soil Parameters
<b>Set-up Treatment</b> (early season control only)	162	50	
<b>Extended Control</b>	202	40	Coarse/medium texture, O.M. 1 - 3%
	243	33	Medium-fine/fine texture, O.M. 3 - 6%

## How does Authority® Supreme herbicide fit into my crop rotation?

Crops	Rotation Interval
Soybeans, field peas, chickpeas	Any time
Winter wheat	4 months
Field corn, spring and durum wheat, barley, oats, canola, mustard, sunflowers	12 months
Lentils	24 months
Sugar beets	36 months

### Crop

- Soybeans

### Weeds

#### Grassy weeds

- Green foxtail
- Yellow foxtail
- Giant foxtail
- Downy brome
- Japanese brome
- Barnyard grass
- Witchgrass
- Large crabgrass
- Wild oats<sup>1</sup>
- Smooth crabgrass

#### Broadleaf weeds

- Redroot pigweed
- Green pigweed
- Cleavers
- Common waterhemp
- Common ragweed<sup>1</sup>
- Common groundsel
- Common purslane
- Eastern black nightshade
- Powell pigweed
- Yellow wood sorrel
- Stinkweed
- Cow cockle
- Kochia
- Lamb's-quarters
- Wild buckwheat
- Wild mustard<sup>1</sup>

<sup>1</sup>Suppression

**Questions? Ask your retailer about Authority® Supreme herbicide today.**

**Addition of the following restrictions for all uses:**

- Do not apply to soils classified as coarse-textured soils.
- Do not use on peat or muck soils.
- Do not apply on any type of soils with an organic matter content greater than 6%.
- Do not use on soils with a pH of 7.8 or greater.

Always read and follow label instructions.
