RATE AND APPLICATION GUIDE

NEW! Coragen® MaX insecticide is now a more sustainable product.

The new 3x more concentrated formulation comes in a 2 L jug that covers the same acres as the previous Coragen insecticide 6 L jug but with less product. The lower volumes, smaller warehouse footprint, less plastic and less packaging to handle means added efficiencies for growers and retailers.

Coragen MaX insecticide is powered by Rynaxypyr® active, a unique mode of action that provides remarkable plant protection that's unlike any other chemistry. As a Group 28 product, Coragen MaX insecticide brings the added benefit of having no known cross-resistance to other chemistries and it delivers reliable, long-lasting protection against key insects.

Coragen MaX insecticide has minimal impact on many important beneficial insects and pollinators*, and its unique environmental and toxicological profile make it a sound choice for growers and applicators.
