

Field Development Summer Intern

Contract Duration:
4 months (May 2023 – August 2023)

Location:
Saskatoon, SK
(Hanley Research Station)

This role will assist with the field development and evaluations of FMC crop protection products. As a field development summer intern, you will have the opportunity to learn about the features, benefits and characteristics of FMC products, and gain experience in safe and proper product use. Working closely with the field station managers, you will conduct agronomic operations, including land preparation, seeding, spraying, maintaining and harvesting in order to produce crops used in field experiments. You will accurately measure test substances, evaluate and maintain research plots.

A passion for agriculture is key for this role. Candidates must be enrolled in an Agronomy, Plant Science, or related agricultural degree or diploma program for a minimum of one year. As a self-motivated, enthusiastic, team player, you will play a contributing role in developing relationships with sales representatives, retailers and growers. Your commitment to safety must shine through both on and off the job. Candidates should have the ability to work accurately and quickly, perform physical tasks as required (lifting, bending, field walks). Candidates must possess a valid driver's license and a good driving record.

As a talented, passionate and hardworking candidate, a role with FMC will provide you with an interesting, challenging and exciting opportunity. FMC offers you endless possibilities to use all of your skills and play a contributing role in helping growers. We're looking for not just any professional, but those with a deep desire to work at the leading edge of agriculture. Join FMC Canada today and be part of a company committed to innovation, science and sustainable solutions. **To apply, please send your resume and cover letter to Deanna McLennan at deanna.mclennan@fmc.com.** We thank all applications, however, only those selected for an interview will be contacted.

FMC Corporation is an agricultural sciences company with a proud history of serving farmers for more than a century. Our purpose is to enhance the growth of agriculture through the sustainable protection of crops. We dedicate ourselves to tackling our customers' greatest challenges head-on with innovative herbicides, insecticides, and fungicides that add value to their operations.

FMC has been present in Canada for over 15 years and is proud to partner with growers across the country by providing a broad range of crop protection chemistry, agronomic service and support.
