

See the Difference You're Making

Thanks to retailers like you, the FMC Clean Fields, Community Yields program has contributed over **\$600,000** to **270 community projects** across Western Canada in just five years.

No one knows your community better than you. From pools and libraries to ice rinks, golf courses, community centres, 4-H clubs and more — every project was selected by local retailers to support the places and programs that matter most.

Here's how the program works:

- You and your FMC Account Manager select a worthy organization or community project
- FMC donates \$0.10/acre of eligible fall herbicide sales — including **Authority Strike™** herbicide, now registered for **fall application**
- Product must be sold between **July 15 and October 31, 2025**, with a **minimum of 3,500 acres** of eligible products sold
- Your FMC Account Manager will reconcile the program and deliver a cheque to the chosen organization by **May 31, 2026**
