

Intruvix® II herbicide consistently provides quick and lasting burnoff control of tough weeds like kochia, narrow-leaved hawk's-beard and volunteer canola in front of cereals

What is Intruvix® II herbicide?

Adding Intruvix® II herbicide to your glyphosate provides an exceptional burnoff before planting cereals. It delivers fast-acting, systemic action on many broadleaf weeds and uses 4 modes of action when tank-mixed with glyphosate, to prevent resistant weed escapes.

How does Intruvix® II herbicide help my farm business?

Top Quality Performance

- Intruvix® II herbicide is fast acting with the power of systemic action for unparalleled weed control.
- Over 50 labelled weeds including kochia, cleavers, volunteer canola, wild buckwheat and narrow-leaved hawk's-beard.

Manage Weed Resistance

- Resistant weeds are a growing problem for Canadian farmers.
- Intruvix® II herbicide, plus glyphosate, uses 4 modes of action to tackle resistant weeds.

Flexibility

- Suitable for all soil types from brown to black to grey.
- For spring burnoff and chemfallow applications, Intruvix® II herbicide offers wide-open recrop flexibility next spring.
