BENEVIA™ 10 OD

Insecticide

GENERAL INFORMATION:

BENEVIA™ 10 OD is an oil dispersion formulation (OD) insecticide that contains 100 g/L of cyantraniliprole.

BENEVIA™ 10 OD is an insecticide used for the control of aphids, thrips and whiteflies on beans (with pods), aphids and thrips on peas (with pods), and thrips and whiteflies on tomatoes.

Cyantraniliprole 100 g/L OD provides insect control through activation of the pyranidine receptors of the target insect.

DIRECTIONS FOR USE:

BENEVIA™ 10 OD is an insecticide used for the control of sucking and chewing insect pests in a range of crops. Activity on pest insect larvae is primarily by ingestion, but also by contact. The product has ovicidal, ovi-larvicidal and adulticide efficacy, depending upon the pest species. Exposure of the pest species typically results in rapid feeding cessation within a few hours of exposure, however the time to death may take 3 to 6 days, depending upon the species.

Monitor insect populations to determine whether or not there is a need for application of **BENEVIA™ 10 OD** based on locally determined economic thresholds. More than one treatment of **BENEVIA™ 10 OD** may be required to control a population of pests.

BENEVIA™ 10 OD can be used on all varieties of the crops that are labelled. The maximum number of applications per crop is two.

CROP	PESTS	COMMENTS	RATE OF USE	PHI
French beans	Aphids Thrips Whiteflies	Can be used at any growth stage with weekly interval. Do not use more than 2 applications per season	450-600 ml/ha Use in 1000L/ha spray volume.	1 day
Snow Peas	Aphids Thrips		9-12ml/20L Knapsack	1 day
Tomato	Thrips Whiteflies		Use lower rate when pest infestation on crops is low. Higher rate when pest infestation is high and to increase the marketable yield.	1 day

BENEVIA™ 10 OD insecticide should be used only in accordance with recommendations on this label.

MIXING INSTRUCTIONS:

Shake well before use. Prior to application, start with clean, well-maintained application equipment. **BENEVIA™ 10 OD** mixes easily with water and should be added directly to the spray tank during filling. Fill spray tank 1/4 to 1/2 full of water. Add **BENEVIA™ 10 OD** directly to spray tank. Mix thoroughly to fully disperse the insecticide, continue agitation until spraying is complete.

Recommend to use - If the spray tank pH is less than 8 no adjustment of the spray tank pH is necessary. If the pH of the spray tank after all products have been added and mixed is pH 8 or above, it is recommended to either adjust the pH to pH 7 or less using a registered acidifying agent, or use the spray mixture within a 4 hour period after preparation. It is not recommended to store the spray mixture overnight in the spray tank.

SPRAY DRIFT MANAGEMENT:

Special care must be taken to avoid spray drifts outside the target area, or onto ponds, waterways or ditches. Applying larger droplets reduces drift potential, but will not prevent drift if applications are made improperly or under unfavourable environmental conditions. It is the responsibility of the applicator to determine that a sprayer is suitable for the intended application, is configured properly, and that a drift is not occurring.

SPRAY TANK CLEANOUT:

Immediately following application, thoroughly clean all spray equipment to reduce the risk of forming hardened deposits which might become difficult to remove.

Drain spray equipment. Thoroughly rinse sprayer and flush hoses, boom, and nozzles with clean water. Clean all other associated application equipment. Take all necessary safety precautions when cleaning equipment. Do not clean near wells, water sources or desirable vegetation. Dispose of waste rinse water in accordance with local regulations.

RESTRICTIONS:

Do not apply to crops under stress.

RAINFALLSTNESS:

BENEVIA™ 10 OD is rain fast after the spray has dried on the foliage for 2 hours.

RESISTANCE STATEMENT:

When insecticides with the same mode of action are used repeatedly over several years in the same field, naturally occurring less sensitive strains may survive, propagate and become dominant in that field. An insect is considered resistant to an insecticide if it survives a correctly applied treatment at the recommended dose and timing under normal weather conditions and a validation test with a suitable bioassay confirms the lack of activity. When resistance occurs, recommended rates

fail to suppress the pest population below economic thresholds. Development of resistance can be avoided or delayed by alternating or mixing products having different modes of action. Tank-mixtures with other effective insecticides for the target pests may also be recommended.

BENEVIA™ 10 OD is an IRAC Group 28 Insecticide (ryanodine receptor modulator - diamide).

Best practices for resistance management of Group 28 insecticides include;

- Avoid using the same mode of action (same IRAC group number) on consecutive generations of insect pests.

BEES:

BENEVIA™ 10 OD is toxic to bees when exposed to direct treatment on blooming crops or weeds. Apply to crops or crops with weeds only when bees are not active, preferably after daily bee flight. Avoid spray drift to off-field bee-attractive habitats.

STORAGE/HANDLING:

Do not subject to temperatures below 0 degrees C. Store product in original containers only in a location inaccessible to children and pets. Do not contaminate water, other pesticides, fertilizer, food or feed in storage.

WASTE & CONTAINER DISPOSAL:

Do not contaminate water, food, or feed by storage or disposal. Wastes resulting from the use of this product must be disposed on site or at an approved waste disposal facility.

Never re-use empty containers. Dispose empty container in a safe and authorized place. Do not dispose of concentrate or spray solution in domestic sewer systems. Dispose of unused product in a safe and authorized place according to National Regulations on disposal.

FIRST AID MEASURES:

General advice: Never give anything by mouth to an unconscious person.

Inhalation: No hazards which require special first aid measures. If inhaled, remove to fresh air. Consult a physician after significant exposure.

Skin contact: Take off contaminated clothing and shoes immediately. Wash off immediately with soap and plenty of water. Wash contaminated clothing before re-use. In the case of skin irritation or allergic reactions see a physician. Prolonged or repeated skin contact may cause allergic reactions in some individuals.

Eye contact: No specific intervention is indicated as the compound is not hazardous. If easy to do, remove contact lens, if worn. Rinse with water. If eye irritation persists, consult a specialist.

Ingestion: No specific intervention is indicated as the compound is not hazardous. Not a probable route of exposure. However, in case of accidental ingestion, call a physician. DO NOT induce vomiting unless directed to do so by a physician or poison control center. If victim is conscious: Rinse mouth with water.

Symptoms: No cases of human intoxication are known and the symptoms of experimental intoxication are not known.

Skin contact may provoke the following symptoms: Sensitising effects

Indication of any immediate medical attention and special treatment needed: Treatment: Treat symptomatically.

**IN CASE OF POISONING CALL TOLL FREE NUMBER: 0800 730030/0800
720021 (24hrs)**

NOTICE TO USER:

This pest control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use or store a pest control product under unsafe conditions

SELLERS GUARANTEE:

Seller's guarantee is limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition

BENEVIA™ 10 OD

Insecticide / Kiuia Wadudu

MAELEZO YA KAWAIDA:

BENEVIA™ 10 OD ni dawa ya kuangamiza wadudu ya oil dispersion formulation (OD) iliyo na 100 g/L of cytraniliprole inayotumika kudhibiti wadudu wa aina tofauti wa kutufuna na kunyonya maji kwenye mimea iliyopandwa shambani au ndani ya green house.

Cytraniliprole 100 g/L OD hufanya kazi kwa kusisimua "ryanodine receptors" za mdudu.

INATUMIKA KWA:

BENEVIA™ 10 OD ni dawa ya kuangamiza wadudu aina ya aphids, thrips na whiteflies kwenye maharagwe (yalilo na maganda), aphids na thrips kwenye mbaazi (zilizo na maganda) na thrips na whiteflies kwenye nyanya.

JINSI YA KUTUMIA:

MMEA	WADUDU	MAELEZO	KIWANGO	PHI
French beans (Michirii)	Aphids Thrips Whiteflies	Inaweza kutumiwa kwenye mmea wa ukubwa wowote kila wiki. Usitumie Zaidi ya mara 2 kwenye msimu mmoja wa mmea	450-600 ml/ha kutumika na 1000L/ha spray volume.	Siku 1
Mbaazi (zilizo na maganda)	Aphids Thrips		9-12ml/20L Knapsack	Siku 1
Nyanya	Thrips Whiteflies	Tumia kipimo cha chini wakati viwango ya wadudu waharibifu viko chini na kiwango cha juu wakati wadudu waharibfu wako kwa wingi		Siku 1

BENEVIA™ 10 OD ni dawa ya kuzua wadudu wa kunyonya maji na kutufuna kwenye mimea ya aina mbalimbali. Hufanya kazi viwavi wanapomeza au kuguswa na dawa. Kulingana na aina tofauti ya wadudu dawa hii na madhara kwa mayai na viwavi ya aina muhimu kwa wadudu. Mdudu anapokumbana na dawa hii huwacha kula mmea baada ya masaa machache na kufa baada ya siku tatu au sita. Tathmini wingi wa wadudu ili uamue kama kuna haja ya kutumia. **BENEVIA™ 10 OD** ukizingatia hali ya uchumi. Unaweza kutumia **BENEVIA™ 10 OD** zaidi ya mara moja kuthibiti wingi wa wadudu. **BENEVIA™ 10 OD** inaweza kutumika kwenye mimea yote iliyotajwa kwenye kibandiko. Tumia dawa mara mbili (2) tu kwenye msimu mmoja wa mmea.

CYAN MAGENTA JAUNE NOIR

BENEVIA™ 10 OD lazima itumike kulingana na maagizo kwenye kibandiko.

BENEVIA™ 10 OD kustahamili mvua na kugandama kwenye mmea ili kusaidia kuthibiti wadudu.
Changanya kiasi kidogo cha "Adjuvant" na dawa hii kabla ya kunyonyizia kwenye mmea ili kuangalia utangamanio.

USIMAMIZI UNAPOFUKIZA DAWA:

Uangalifu maalum unahitajika kuzuia dawa kunyonyuziwa kando ya mahali palipolengwa, au kwenye vidimbwi nya maji, mitaro ya maji au mashimo. Kunyonyiza matone makubwa ya dawa hupunguza "drift potential", ijapokua haitazuia 'drift' kama unyonyizaji umefanywa vibaya au kwenye mazingira yasiyofaa. Ni jukumu la mnyonyizaji kuhakikisha kuwa chombo cha kunyonyiza dawa kiko sambamba

KUSAFISHA TANKI LA KUNYONYIZIA:

Mara tu baada ya matumizi vifaa vyote nya dawa viliviyotumika visafishwe vizuri kuondoa uwerekano wa kuweka matabaka magumu ya dawa ambayo ni magumu kutoa. Titirisha vifaa hivyo na maji, Suuza kinyonyizio na vuta maji safi katika "hoses", "boom" na "nozzles". Safisha vifaa vyote vingine husika. Unaposafisha vifaa hivi fuata masharti na tahadhari za usalama. Usifanye usafi karibu na visima nya maji, vyanzo nya maji au mmea. Tupa maji ya yaliyotumika kusuza vifaa ukizingatia kanuni za mammaka husika.

MASHARTI:

Usinyunyize dawa kwenye mimea ilio na "stress".

KUHIMILI MVUA:

BENEVIA™ 10 OD haiwezi kuondolewa kwenye majani masaa 2 baada ya kunyonyiziwa kwani itakua imeshakauka.

NYUKI:

BENEVIA™ 10 OD ni sumu kwa nyuki inaponyunyiziwa moja kwa moja kwenye mimea au magugu inayotoa maua. Nyunyiza dawa kwenye mimea au magugu inayotoa maua wakati tu nyuki hawako au hawafanii kazi haswa baada ya wakati wao wa kupepea. Ni vyema kuzuia dawa kunyonyiziwa au kwenda mahali nyuki wanapoishi.

MAVAZI YA KINGA YA KIBINAFSI WAKATI WA KUNYONYIZIA DAWA:

Si lazima kuvaa mavazi yoyote ya kinga wakati wa kutayarisha au kunyonyiziwa dawa. Hata hivyo ni vyema kutumia "gloves" wakati wa matayarisho ya dawa na kuondoo kufungana kwa "nozzles". Inapendekwezwa kuvaa "coverall" na "goggles" unaponyunyiziwa dawa ndani ya "greenhouse" na "air blast sprayer without cab".

KUHIFADHI/ UTUNZAJI:

Isikae mahali ambapo joto ni chini ya digrii 0. Hifadhi kwenye kiwekeo cha awali mbali na watoto na wanyama. Usichafue maji, dawa zengine, mboleo, vyakula au lishe zilizo ghalani.

MAELEZO YA KUTUPA VIWEKEO NA MASALIA YA DAWA:

Usichafue maji, vyakula au lishe za wanyama wakati wa kuhifadhi au kutupa masalia ya dawa. Masalia yote yatupwe mahali palipoidhinishwa na mamfaka husika. Usitumie chombo kitupu kilichokua na dawa kwa njia yoyote. Tupa vyombo wa dawa mahali salama na palipoidhinishwa. Dawa iliyobaki pamoa na maji yaliyoosha chombo au bomba lazima yamwagwe kwenye shimo lililo mbali na visima au vidimbwi nya maji kulingana na sheria za nchi za utupaji.

TARATIBU ZA HUDUMA YA KWANZA:

Maagizo ya kawaida: Usimlishe kitu chohotue mtu asiyekua na fahamu.

Ikivutwa na pumzi: Hakuna madhara yatakayo hitaji huduma ya kwanza .mpeleke mjeruhi mahali kwenye hewa safi. Mwone mtaalamu wa tiba kama umevuta kwa muda mrefu.

Ikigusa ngozi: Toa nguo na viatu viliviyopata dawa mara moja. Osha ngozi kwa maji mengi na sabuni mara papo hap . Osha nguo na viatu viliviyopata dawa kabla ya kuvaa tena. Iwapo utapata mwasho wa ngozi mwone mtaalamu.

Ikigusa jicho: Hakuna madhara yatakayohitaji huduma ya kwanza. Osha jicho kwa maji mengi likiwa limefunguliwa. Ikibidi mwone mtaalam wa tiba.

Ikimezwa: Hakuna madhara yatakayohitaji huduma ya kwanza. Ikibidi mwone mtaalam wa tiba. Usimlazimishe mjeruhi kutapika isipokuwa umepewa maelezo na daktari au wataalam wa sumu. Mjeruhi akiwa na fahamu suuu mdomo na maji mengi safi.

PELEKA MJERUHI KWA DAKTARI.

ARIFA KWA DAKTARI

Dalili: Hakuna kesi za sumu kwa mwanadamu zinazojulikana.

Ikigusa ngozi inaweza kuleta dalili ifutayo: Madhara ya kuwa na ngozi tete.

Ikihitaji matibabu kutoka kwa mtaalam au daktari: Tibu: Tibu kulingana na dalili.

WAKATI WA KUSUMIKA PIGA SIMU YA BILA MALIPO: 0800 730030/0800 720021 (Masaa 24)

ILANI KWA MTUMIAJI:

Dawa hii sharti itumiwe kulingana na maangizo yaliyo kwenye kibandiko. Ni hatia chini ya sheria za madawa ya kuangamiza wadudu waharibifu kutumia au kuhifadhi dawa hii katika hali isioy salama.

THIBITISHO KWA MUUZAJI:

Dhamana ya muuzaji ni maelezo yaliyo kwenye kibandiko ambayo ni lazima yafuatwe kikamilifu. Mnumu zi lazima akubali hatarí zozote zinazoweza kutohana na matumizi ya dawa hii kwa binadamu au mali na lazima aikubali dawa hii katika hali hiyo.

CYAN MAGENTA JAUNE NOIR
