DOSE RATES AND USE RECOMMENDATIONS

Dragnet FT is a special long-lasting formulation suitable for the control of soil termites in buildings, lawns, gardens and timber. It also controls wood ingesting insects such as ants, termites, carpenter bees, old house borers and powder post species. Prepare aqueous solution of 0.5% a.i. by mixing 1 l of Dragnet FT in 76 l of water and use as specified below.

a) Concrete slab in buildings under construction: 1. Treat the outside of the foundation wall trenches with 5 l of solution per linear metre per 0.3 m depth. Replace the soil and apply another 5 l of solution per linear metre. Cover the trench and fill the treated soil with a thin layer of untreated soil. 2. Apply 4 l of solution/m2 under the slab, entrance platforms and porches. Ensure uniform coverage.
b) Established concrete slab buildings: Prepare 0.3m deep trenches along the outside foundation walls. Treat as a). Drill along the inner foundation walls and selected floor sites at intervals of 45cm and inject Dragnet FT solution under the concrete slab. Cover the drilled holes.
c) Mud floor houses under construction: Treat the external surfaces of pole holes with Dragnet FT solution to depths of 40-75 cm in trenches along the outside wall. Treat as a). Treat soil on the floor in place at the rate of 4 l/m2. Cover with 5cm of untreated soil.
d) Establishd mud floor houses: Prepare 0.3m deep trenches along the outside of the walls. Treat as a). Drill along the inner walls and selected floor sites at intervals of 45cm and inject the Dragnet FT solution to depths of 40-75cm. Cover the drilled holes.
e) Posts, poles: Previously installed poles and posts may be treated by sub-surface injection or gravity flow through holes made from the bottom of a trench around the pole or post. Treat all sides to create a continuous insecticide barrier around the pole. Use 4 l of Dragnet FT/30cm depth for poles less than 15cm diameter. For larger poles use 5.7 l/30cm depth. Apply to a depth of 15cm below the bottom of the wood.
f) Termite nests: Remove the top 15cm of soil and pour the solution down the tunnels. Replace the soil after treatment.
g) Lawns and gardens: Established: Spray affected areas at the rate of 1.5 l of Dragnet FT solution per 10m2. Cover with a thin layer of soil after treatment. Establishing: Before planting, spray the soil at the rate of 1.5 l of Dragnet FT solution per 10m2. Incorporate the spray into the soil.
h) Timber and fencing poles: Mix 1 l of Dragnet FT in 76 l of water. Dip or spray the timber thoroughly to point of runoff. Soak ends of fencing poles for 30 min. and treat the soil in holes by pouring in the solution by a water can or bucket. For outside structure fan, spray (max. 25 psi pressure) to run off.

PRECAUTIONS

Avoid contact with skin, eyes, nose and mouth. Wear adequate protective clothing. Wash hands and exposed skin with soap and water before eating, drinking and smoking after work. Toxic to fish and bees. Do not contaminate water supplies with flushing water or empty containers.

FIRST AID INSTRUCTIONS

If ingested: Dilute by giving 1 or 2 glasses of water. DO NOT induce vomiting. Never give anything by mouth to an unconscious person. Call a doctor immediately.
If in eyes: flush with water for at least 15min. If irritation occurs and persists, get medical attention.
If on skin: remove contaminated clothing and wash with plenty of soap and water. Get medical attention if irritation occurs and persists.
If inhaled: remove patient to fresh air. If breathing difficulty or discomfort occurs and persists, get medical attention.
In case of emergency call Toll Free Nos. 0080720021 or 00800730030 (24hrs)

NOTE TO DOCTOR-TOXICOLOGICAL INFORMATION

Consideration should be given to gastric lavage with an endotracheal tube in place. Activated charcoal and a cathartic are recommended and nervous stimulation should be controlled with a sedative (e.g.: barbiturates). Reversible skin sensations (paresthesia) may occur; ordinary skin salves have been found useful in reducing discomfort. Treatment is otherwise controlled removal of exposure followed by symptomatic and supportive care.

STORAGE AND DISPOSAL

Store in original container only in a cool, dry, wellventilated place. Do not use or store near heat, open flame or hot surfaces. Keep out of reach of children and animals. Do not contaminate other pesticides, fertilizers, water, food or feed by storage or disposal. Prevent spilled liquid from spreading with the most readily available material e.g. sand or earth. Absorbed spilled liquid should later be safely disposed of. To dispose of containers, triple rinse with detergent (or equivalent) and offer for recycling, reconditioning or disposal in approved landfill. Consult local disposal authorities for approved alternative procedure.

WARRANTY

FMC makes no warranty, expressed or implied concerning the use of this product other than indicated on the label. Buyer and user assume all risk of use and/or handling and/or storage of this material when such use and/or handling and/or storage is contrary to label instructions. Buyer's or user's exclusive remedy for damages for breach of warranty or negligence shall be limited to direct damages not exceeding the purchase price paid and shall not include incidental or consequential damages.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use or store a pest control product under unsafe conditions.

VIPIMO VYA DAWA NA JINSI YA KUTUMIA
Dragnet FT ni dawa maalum inayofanya kazi kwa mda mrefu inayofaa kwa kuzuia mchwa, kwenye majengo, bustani na katika mbao. Pia hukomesha wadudu wanaokula mbao kama vile chungu, mchwa na aina mbali mbali za wadudu wanaotoboa mbao. Tayarisha dawa kwa kiasi cha asilimia 0.5% a.i. kwa kuchanganya dawa ya Dragnet FT kiasi cha Lita moja kwa maji ya kiasi cha Lita 76 na utumie kama ifuatavyo.

a) Mabamba ya mawe kwenye majengo yanayojengwa: 1. Tia dawa katika sehemu ya nie ya msingi wa nyumba kiasi cha dawa cha Lita 5 kwa kiasi cha mita moja kwenye mtaro wa kina cha 0.3 ya mita. Fukia mtaro huo kisha mwagilia dawa kiasi sawa na hicho. Fukia tena mtaro kisha nyunyiza mchanga usiokuwa na dawa katika sehemu iliyotiwa dawa. 2. Tia dawa kiasi cha Lita 4 chini ya ubamba wa mawe kiasi cha mita moja mraba, kwenye milango ya kuingilia, ukumbini. Hakikisha umeeneza dawa kwa viwango na maeneo sawa.

b) Katika ubamba wa mawe ya majengo yaliyo tayari: Chimba vitaro vya kina cha 0.3 mita katika sehemu ya nje ya msingi wa nyumba. Tia dawa kama ilivyoagizwa katika a) Toboa mashimo katika sehemu za na dani za kuta na uchague sehemu tofauti tofauti kwenye sakafu na utayarishe vishimo vilivyoachana umbali wa sentimita 45 kisha utie dawa ya Dragnet FT chini ya ubamba wa mawe. Funika vishimo vilivyotobolewa.

c) Nyumba za sakafu ya udongo zinazojengwa: Mwagilia dawa sehemu za mchanga kiasi cha sentimita kati ya 40 na 75 kwenye vitaro kando kando ya ukuta. Tia dawa kama ilivyoagizwa katika a). Tia dawa katika kiwango cha Lita 4 kwa mita moja mraba. Nyunyiza mchanga usiokuwa na dawa wa kina cha sentimita tano.

d) Nyumba za zamani za sakafu ya udongo: Chimba vitaro vya kina cha 0.3 ya mita kando kando ya kuta. Tia dawa kama katika a). Toboa vishimo katika sehemu za ndani za ukuta na kwenye sakafu vikiwa vimeachana umbali wa sentimita 45 kisha utie dawa ya Dragnet FT kufikia kina cha kati ya sentimita 40 na 75. Funika mashimo yaliyotayarishwa.

e) Mlingoti, Nguzo: Nguzo ambazo zilikitwa kitambo zaweza kutiwa dawa kwa kumwagilia dawa kupitia kwenye vishimo vilivyotobolewa kwenye vitaro, kuzunguka nguzo. Mwagilia dawa kuzunguka nguzo ili kuweka kinga thabiti dhidi ya wadudu. Tumia Lita 4 za Dragnet FT kwa kina cha sentimita 30 kwa nguzo za unene wa sentimita 15. Kwa nguzo kubwa zaidi tumia lita 5.7 kwa kina cha sentimita 30. Mwagilia dawa chini ya nguzo katika mzunguko wa kiasi cha sentimita 15.

f) Viota vya mchwa: Ondoa kiasi cha udongo cha kina cha sentimita 15 kisha mwagilia dawa. Rudisha kiasi hicho cha udongo baada ya kutia dawa.

g) Bustani: Zilizo tayari: Nyunyiza dawa katika sehemu ambako wadudu wanapatikana kwa kiasi cha lita 1.5 cha dawa ya Dragnet FT kwa mita 10 mraba. Funika dawa kwa kunyunyiza mchanga baada ya kunyunyiza dawa. Kuanzisha Bustani: Kabla ya kupanda, nyunyiza dawa kiasi cha lita 1.5 cha Dragnet FT kwa kiasi cha mita mraba. Changanya udongo na dawa.

h) Mbao na viguzo vya boma: Changanya dawa ya Dragnet FT lita moja kwa lita 76 za maji. Tia mbao kwenye dawa ama nyunyiza dawa kwenye mbao hadi kiwango cha kutiririka. Tia sehemu za mwisho za viguzo kwenye dawa kwa muda wa dakika 30 na mwagilia dawa kwenye mashimo ya viguzo kwa kutumia mkebe au ndoo. Kwa majengo ya nje nyunyiza (kiasi cha 25 psi) hadi itiririke.

TAHADHARI
Jiepushe dawa isiguse ngozi ya mwili, kuingia machoni, puani na mdomoni. Vaa nguo za kuihami ngozi. Osha mikono na sehemu zilizoingia dawa kwa sabuni na maji kabla ya kula na kunywa na kuvuta sigara baada ya kazi. Usichafue maji kwa dawa.

MAAGIZO YA KWANZA
Ikimezwa: Ghoshi (zimua) nguvu ya dawa kwa glasi moja au mbili za maji. USIMTAPISHE MGONJWA. Usimlishe kitu chochote kupitia mdomoni kama mhusika amezirai. Mwite daktari haraka.
Ikiwa ni machoni: Yasafishe macho kwa maji kwa kuyarushia macho maji, kwa mda wa dadika 15. Ikiwa utasikia mwasho au mwasho ukiendelea tafuta matitabu.
Ikiwa katika ngozi: Vua nguo zilizoingia dawa, kisha osha ngozi kwa sabuni nyingi. Tafuta matibabu haraka ikiwa mwasho utatokea na kuendelea.
Ikivutwa kwa pua: Mpeleke mgonjwa hadi mahali penye hewa safi. Ikiwa anapumua kwa shida au kusikia vibaya, tafuta matibabu.
Piga simu ya dharura kwa: 00800720021 ama 008007300030 (masaa 24)'

ARIFA KWA DAKTARI - HABARI KUHUSU SUMU
Tahadhari lazima iwepo kuhusiana na magonjwa ya tumbo. Makaa yaliyosagwa na dawa ya kuharisha zimependekezwa pamoja na dawa ya kutuliza. Kusisimuka kwa mishipa kama vile Barbiturates itumiwe. Kwaweza kutokea madhara kwa ngozi ambayo yanaweza kutibiwa, dawa ya kawaida ya kutuliza maumivu imeonekana kufaa katika kukomecha hali mbaya. Matibabu hufanywa kuhusiana na dalili za madhara na utunzaji.

UHIFADHI NA KUTUPA
Weka dawa kwenye chonbo asili cha dawa, iweke mahali baridi pakavu penye hewa safi ya kutosha. Usiweke ama kutumia dawa karibu na mahali penye joto, moto unaowaka, ama sehemu zenye joto. Iweke mahali wasipoifikia watoto na wayama. Usichanganye dawa hii na madawa mengine ya wadudu, mbolea, maji, chakula, katika kuhifadhi ama kutupa. Usiruhusu dawa iliyomwagika kusambaa kwa kuzuia kwa vifaa vinavyopatikana kwa urahisi kama vile mchanga. Dawa ambayo imemwagika na kuingia mchangani baadaye iondolewe kwa njia ya usalama. Ili kumaliza dawa kwenye vyombo vya dawa, visafishe mara kadha kwa sabuni, kisha peleka chombo kusagwa na kufanyiwa vifaa vingine ama kutupa katika sehemu iliyoidhinishwa ya kutupa vyombo hivyo Tafuta ushauri wa wakuu wanaohusika na utupaji wa vyombo hivyo uelezwe njia nyingine ya kutupa vyombo vya aina hiyo.

DHAMANA
FMC haitoi hakikisho lolote, kuhusiana na matumizi ya bidhaa hii isipokuwa ile iliyoelezwa kwenye kibandiko. Mnunuzi mtumiaji ana jukumu lote kuhusu hatari za kuitumia, kuwa nayo ama kuihifadhi. Endapo utumiaji, ubebaji na uhifadhi uko kinyume cha maagizo wanunuzi ama watumiaji wanaokwenda kinyume cha maelezo au kudharau maagizo wana haki ya kulipia hasara kwa gharama inayozidi bei ya kununulia dawa, na haitakuwa ni pamoja na hasara zinazotokana na ajali au bahati baya ama uzembe.
I
LANI KWA MTUMIAJI: Dawa hii ya kuzuia wadudu itumiwe kuambatana na maagizo yaliyoko kwenye kibandiko hiki. Ni hatia chini ya sheria za uzuiaji wa wadudu kutumia ama kuhifadhi bidhaa hii mahali pasipo salama.
