This product is recommended for rice, corn, fruiting vegetables, leafy vegetables, cucurbits, root crops, fruits, citrus, field crops and ornamentals.

Crops Category	Crops	Rate per 16L water	Rate per Hectare (L/ha)	Application Timing	Spray Volume (L/ha)
Leafy vegetables	cabbage, Chinese cabbage, cauliflower, broccoli, lettuce, pechay	40 ml - 320ml	1L to 4L	15 days after transplanting and repeat application at 15 days interval as needed	200 - 400
Fruiting vegetables	tomato, potato, chilli, okra, eggplant, string beans	40 ml - 320ml	1L to 4L	Onset of fruit Development and repeat application at 15 -30 days interval as needed.	200 - 400
Cucurbits	watermelon, bittergourd, squash	40 ml - 320ml	1L to 4L	Onset of fruit Development and repeat application at 15 -30 days interval as needed.	200 - 400
Bulb/Root Crops	onion, garlic, ginger, carrot	40 ml - 320ml	1L to 4L	15 days after transplanting and repeat application at 15 days interval as needed	200 - 400
Rice	Rice	80ml - 400ml	1L to 4L	40 days after transplanting or onset of panicle initiation and repeat application at 15 days interval as needed	160 - 200
Fruits	mango, banana, pineapple, durian	40 ml - 320ml	1L to 4L	Onset of fruit Development and repeat application at 15 -30 days interval as needed.	200 - 400
Citrus –	pommelo, calamansi, mandarin	40 ml - 320ml	1L to 4L	Onset of fruit Development and repeat application at 15 -30 days interval as needed.	200 - 400
Field Crops	tobacco, sugarcane	40 ml - 320ml	1L to 4L	30 days after planting and repeat application at 15 days interval as needed	200 - 400
Field Crops	cacao, coffee	40 ml - 320ml	1L to 4L	Onset of fruit Development and repeat application at 15 -30 days interval as needed.	200 - 400
Ornamentals	orchids, flowers	40 ml - 320ml	1L to 4L	15 days after planting and repeat application at 15 days interval as needed	200 - 400
Corn	yellow corn, sweet corn, white corn	40 ml - 320ml	1L to 4L	30 days after planting and repeat application at 15 days interval as needed	200 - 400
