

SPARTAN® ELITE HERBICIDE

TOUGH ON BROADLEAF WEEDS

SPARTAN® ELITE HERBICIDE

Spartan® Elite herbicide has a double mode of action that's tough on broadleaf weeds such as kochia and pigweeds with excellent residual control.

Spartan Elite herbicide has the added benefit of controlling several annual grass species such as foxtails and barnyardgrass.

Spartan Elite herbicide starts off the season clean from both grass and broadleaf weeds for higher yields at harvest. Spartan Elite herbicide is ideal for no-till sunflower farming as incorporation is not needed.

CONTROLS

- Kochia
- Waterhemp
- Pigweeds
- Lambsquarters
- Eastern black nightshade
- Russian thistle
- Witchgrass
- Foxtails
- Barnyardgrass

QUICK FACTS

- Effective residual control of broadleaf weeds.
- Solution for kochia PLUS grasses.
- Non ALS with multiple modes of action.
- Excellent control of foxtails and barnyardgrass.
- No incorporation needed.
- Double mode of action on pigweeds.

OTHER SUNFLOWER PRODUCTS TO CONSIDER ON YOUR SPARTAN ELITE HERBICIDE ACRES

Burndown: Aim® EC herbicide

At-plant Protection: Mustang® Maxx insecticide

Insecticides: Mustang Maxx insecticide, Stallion® Brand insecticide

TANK-MIX / USE OPTIONS

- Apply with Aim EC herbicide at 1-2 fl. oz./A + MSO adjuvant + glyphosate herbicide for thorough preplant burndown.
- Apply up to three days after planting.
- Can be applied in fall or spring.
- Rates dependent on soil type, OM, pH.

USE RATES – FL. OZ./A

ORGANIC MATTER %	COARSE	MEDIUM	FINE
<1.5	19-21	19-25	21-30
1.5-3	19-25	21-32	25-32
>3	21-25	25-32	32-38.7

For soils with PH > 7.2 use the lowest rate for that specific soil texture and organic matter.

ROTATIONAL CROP GUIDELINES

Soybeans, Sunflowers	Anytime
Wheat, Barley and Rye, Triticale	4.5 months
Corn, Field	4 months
Corn, Pop	10 months
Corn, Sweet	12 months
Sorghum	10 months
Alfalfa, Other Cereal Grains	12 months
Canola	12 months
Sugar Beets	36 months
