

Elevest™ Insect Control

Powered by Rynaxypyr® active

Product Information:

Knock down a broad-spectrum of challenging pests with the lasting residual control of Elevest™ insect control. By maximizing the ratio of ingredients bifenthrin and Rynaxypyr® active, growers get better overall control.

This convenient, fully loaded combination is more effective on stink bugs, plant bugs and brown stink bugs than other similar premix products. It provides best-in-class Lepidopteran control, making it a great fit for growers fighting the worm complex and other insects simultaneously.

Elevest insect control offers superior rainfastness, is easy to mix and clean out of tanks. It provides excellent compatibility with commonly used tank-mix partners labeled for use on the same crops, including insecticides, fungicides, herbicides, foliar fertilizers and adjuvants.

Crops that can benefit from Elevest insect control include soybeans, especially for corn earworms, loopers and stink bug control; cotton, especially for late-season bollworm control; sweet corn, peanuts and potatoes.

Quick Facts:

- Targets key soybean pests often found at the reproductive growth stages including armyworms, corn earworms, soybean loopers and stink bugs.
- Contains maximum active ingredient ratio of industry leading Lepidopteran active, Rynaxypyr (Group 28), with the fast knockdown of superior pyrethroid, bifenthrin (Group 3A), for broad spectrum and better overall control.
- Excellent fit for growers fighting the worm complex and other insects simultaneously.
- Provides fast knockdown of targeted pests.
- Rainfast when dry.
- Labeled for use with soybeans, cotton, sweet corn, peanuts and potatoes.
- Broad-spectrum control with lower risk for mite flares*.

**Except for locations where mite resistance to bifenthrin exists.*

Target Pests:

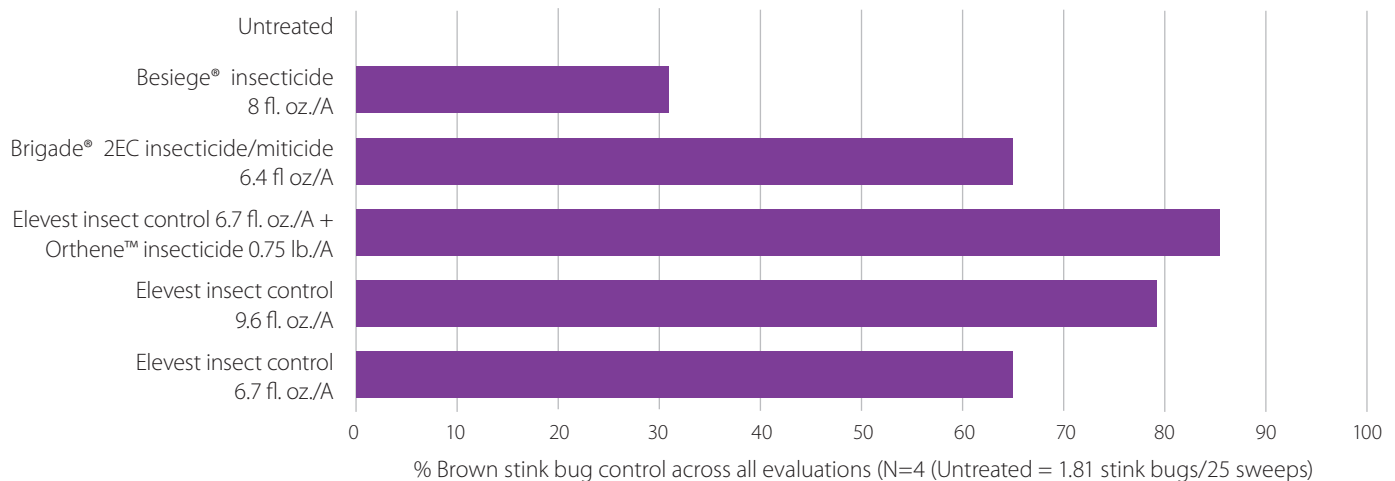

Armyworms	Grasshoppers	Plant bugs**
Bollworms	Beetles	Stink bugs**
Cutworms	Weevils**	Whiteflies**
Loopers	Aphids**	Thrips**
Stem and fruit borers	Fleahoppers	Leafminers**
Webworms	Leafhoppers	Mites**

Active Ingredients:

Bifenthrin, Group 3A
Chlorantraniliprole, Group 28

Efficacy of Elevest™ insect control on brown stink bug (*Euschistus servus*) in soybeans.

SWH-19-202, Dr. Sebe Brown, LSU Alexandria, LA, 2019.

Efficacy of Elevest insect control on bollworms (*Helicoverpa zea*) in cotton.

Mean across five trials (5-8 DAT), four trials (9-14 DAT) or three trials (15-21 DAT) conducted in 2019 in Arkansas, Louisiana, Mississippi, Georgia and North Carolina.

**Some species that are normally difficult to control or may have developed some level of resistance to pyrethroids require a higher rate range of 7.7 – 9.6 fl. oz./A (0.134 – 0.167 lb. ai/A), tank mixing with another insecticide or may only be labeled at 9.6 fl. oz./A. See federal label for specific rates for each crop and pest.
