

# RELIABLE AND CONSISTENT CONTROL

## CORN THREAT ALERT

**Prevathon® insect control powered by Rynaxypyr® active is here for you.**

It doesn't take long for insects to do costly damage to your corn season. By leveraging a breakthrough mode of action, Prevathon insect control helps break the resistance cycle by stopping insect feeding within minutes and delivering long-lasting residual control for up to 21 days.

That's especially important right now with recent reports of local pressure from costly pests. Prevathon insect control is labelled to control these eight key insect threats in your area.

- **WESTERN BEAN CUTWORM**  
14 – 20 fl. oz./A
- **GRASSHOPPER**  
10 – 20 fl. oz./A
- **CORN EARWORM**  
14 – 20 fl. oz./A
- **CORN BORER:**  
**EUROPEAN,**  
**SOUTHWESTERN**  
14 – 20 fl. oz./A
- **ARMYWORMS: FALL,**  
**SOUTHERN, TRUE**  
14 – 20 fl. oz./A

### Optimize yield quality and quantity.

- Controls larvae as they enter the stalk, reducing feeding damage and keeps working for up to 21 days.\*
- Helps eliminate the need for multiple applications per season.
- Allows you to better manage your crop and workload with a favorable worker protection standard profile.
- Minimal impact on many important beneficial insects.

<b>Active Ingredient:</b>	Rynaxypyr (Chlorantraniliprole)
<b>Chemistry Class:</b>	IRAC Group 28
<b>Formulation:</b>	0.43 lb. ai/gal.
<b>REI:</b>	Four hours
<b>PHI:</b>	14 days ears; one day forage/fodder/silage/stover

\*Foliar application will not protect new growth.
