

RELIABLE AND CONSISTENT CONTROL

SOYBEAN THREAT ALERT

Prevathon® insect control powered by Rynaxypyr® active is here for you.

It doesn't take long for insects to do costly damage to your soybean season. By leveraging a breakthrough mode of action, Prevathon insect control helps break the resistance cycle by stopping insect feeding within minutes and delivering long-lasting residual control for up to 21 days.*

That's especially important right now with recent reports of local pressure from costly pests. Prevathon insect control is labelled to control these six key insect threats in your area at a rate range of 14 - 20 fl. oz. per acre.

- **CORN EARWORM**
- **ARMYWORMS:
BEET, FALL, SOUTHERN**
- **SOYBEAN LOOPER**
- **TOBACCO BUDWORM**

Optimize yield quality and quantity.

Prevathon insect control delivers effective, long-lasting residual control.

- Controls larvae as they enter the stalk, reducing feeding damage and keeps working for up to 21 days.*
- Helps eliminate the need for multiple applications per season.
- Allows you to better manage your crop and workload with a favorable worker protection standard profile.
- Minimal impact on many important beneficial insects.

Active Ingredient:	Rynaxypyr (Chlorantraniliprole)
Chemistry Class:	IRAC Group 28
Formulation:	0.43 lb. ai/gal.
REI:	Four hours
PHI:	One day

*Foliar application will not protect new growth.
