

WANT NOT, WASTE NOT.

Prevathon® insect control has been a reliable, go-to choice for growers when it comes to controlling costly, yield-robbing pests. But now it's easy to do more with less. New Vantacor™ insect control powered by Rynaxypyr® active features that same trustworthy active ingredient to control the Lepidopteran worm spectrum including armyworms, corn earworms, cotton bollworms and tobacco budworm, but now in a highly concentrated, advanced formulation that delivers targeted, long-lasting control using just a fraction of formulated product.

What does that mean for you? Considerably less product handling and reduced container disposal for every application without sacrificing the control you count on to protect your fields.

PREVATHON INSECT CONTROL		VANTACOR INSECT CONTROL
