

Anthem® Flex Herbicide

Protect Your Soybean Yields With Anthem® Flex Herbicide

SOYBEANS

PRODUCT INFORMATION:

Anthem® Flex herbicide from FMC provides residual control of grasses and broadleaf weeds in soybeans. This low-use-rate herbicide provides the resistance management power you need with the flexibility you want. It has a wide application window and comes in an easy-to-mix formulation.

Anthem Flex herbicide delivers long residual control and suppression of tough grasses and small-seeded broadleaf weeds including waterhemp and Palmer amaranth in soybeans. For additional weed control, use preplant/preemergence tank mixes or sequential applications of Authority® brand herbicides.

With Anthem Flex herbicide, you have a powerful resistance management tool. It is effective at controlling weeds with known resistance to glyphosate and ALS herbicides.

QUICK FACTS:

- Labeled for use in soybeans.
- Applied in all tillage systems, including no-till.
- Early preplant, preplant incorporated and preemergence applications.
- Low use rate: 2.75 - 6.4 fl. oz./A.
- Control of key annual grasses and broadleaf weeds.
- No known resistance.

Annual Broadleaves Controlled - Preplant/Preemergence

Amaranth, Palmer	Purslane, common
Amaranth, Powell	Pusley, Florida
Carpetweed	Sida, prickly (Teaweed)
Pigweed, redroot	Waterhemp, common
Pigweed, smooth	Waterhemp, tall
Pigweed, tumble	

Annual Broadleaves Suppressed - Preplant/Preemergence

Buckwheat, wild	Mayweed, chamomile
Chickweed, common	Morningglory, entireleaf
Fleabane, hairy	Morningglory, ivyleaf
Groundsel, common	Morningglory, pitted
Henbit	Nightshade, black
Horseweed (marestail) Emerging from seed. Not overwintering plants.	Nightshade, hairy
Kochia (including triazine and ALS resistant)	Nightshade, Eastern black
Lambsquarters, common	Ragweed, common
Jimsonweed	Spreading orach
	Velvetleaf

Application Timing

Early preplant, preplant incorporated and preemergence applications.

Product Use Rate:

2.25 - 6.4 fl. oz./A

Restrictions:

Do not apply more than 0.186 lb. ai/A of pyroxasulfone and 0.023 lb. ai/A of carfentrazone-ethyl in a year including preplant burndown.

Please see the label for a complete list of restrictions.

Label:

Active Ingredient: Pyroxasulfone (Group 15); carfentrazone-ethyl (Group 14)

Mode of Action: Pyroxasulfone inhibits very-long-chain fatty acid synthesis as a Group 15 herbicide. It is a root and shoot growth inhibitor that controls susceptible germinating seedlings before or soon after they emerge from the soil.

ANTHEM FLEX HERBICIDE EARLY PREPLANT			
EARLY PREPLANT	COARSE	MEDIUM	FINE
15-45 days prior to planting	2.75 - 3.8 fl. oz./A	4.0 - 5.0 fl. oz./A	5.0 - 6.4 fl. oz./A

ANTHEM FLEX HERBICIDE PREPLANT, PREPLANT INCORPORATED AND PREEMERGENCE APPLICATION RATES			
ORGANIC MATTER	COARSE	MEDIUM	FINE
Less than 1%	2.25 - 2.75 fl. oz./A	2.75 - 4.0 fl. oz./A	4.0 - 5.50 fl. oz./A
1 to 3%	2.25 - 3.8 fl. oz./A	2.75 - 5.5 fl. oz./A	4.5 - 6.4 fl. oz./A
Greater than 3%	3.8 fl. oz./A	4.0 - 5.5 fl. oz./A	4.5 - 6.4 fl. oz./A
