

## Anthem® MAXX Herbicide

Anthem® MAXX herbicide from FMC is a concentrated formulation that offers growers superior control and long-lasting residual control with a dramatically lower use rate in both corn and soybeans. Anthem MAXX herbicide also provides growers a wide application window and helps them control a spectrum of broadleaves, including ALS-, triazine- and glyphosate-resistant weeds like waterhemp, Palmer pigweed and others. Tough grasses such as foxtails, crabgrass and fall panicum can't keep up with its impressive residual either.

Anthem MAXX herbicide comes in an easy-to-handle formulation that's easily and effectively tank mixed with burndown, preplant and preemergence herbicides, glyphosate, post herbicides and liquid fertilizers. It often follows Authority® brand herbicides in soybeans to provide season long, overlapping residual coverage.

Parameter	Corn	Soybeans
<b>Active Ingredient</b>	Pyroxasulfone + fluthiacet-methyl	
<b>Chemical Class</b>	Group 14 and 15	
<b>Product Use Rates (fl. oz./A)</b>	2.0 - 6.5	2.0 – 5.7
<b>Application Timing</b>	Preemergence through V4 corn stage.	Preemergence through V6 soybean stage.
<b>Restrictions</b>	Do not apply more than 0.0089 lb. ai/A of fluthiacet-methyl or 0.266 lb. ai/A of pyroxasulfone per acre in a 12-month cropping year including preplant burndown. Please see product label for a complete list of restrictions.	
<b>PHI</b>	Field, seed, silage, popcorn: 30 days forage; 70 days grain/stover. Sweet corn: 40 days forage, ears.	60 days
<b>Key Grasses Controlled</b>	Barnyard grass, crabgrass spp., fall panicum, foxtail spp., goose grass, Italian ryegrass.	
<b>Key Broadleaves Controlled</b>	Eastern black nightshade, Palmer amaranth, prickly sida, waterhemp, pigweed spp.	

## Comparison of Anthem<sup>®</sup> MAXX Herbicide to Other Group 15 Herbicides

### Labeled for both Corn and Soybeans

- Preplant, preemergence and early postemergence application options.
- Controls and suppresses key broadleaf weeds and grasses.
- Controls weeds with resistance to glyphosate, triazines and ALS-inhibiting products.

### Corn Herbicide Programs

Corn Program	Products and Rates
<b>Preemergence One-Pass Program</b>	Anthem <sup>®</sup> MAXX herbicide 4 fl. oz./A + mesotrione 6 fl. oz./A + atrazine 1.5–2.0 lbs./A + glyphosate 32 fl. oz./A
<b>Early Postemergence One-Pass Program</b>	Anthem MAXX herbicide 4 fl. oz./A + mesotrione 3 fl. oz./A + atrazine 1.5–2.0 lbs./A + glyphosate 32 fl. oz./A
<b>Two-Pass Program (PRE fb Early Post)</b>	Anthem MAXX herbicide 4 fl. oz./A + atrazine 1.5–2.0 lbs./A + glyphosate 32 fl. oz./A <b>followed by</b> mesotrione 3 fl. oz./A + atrazine 1.0 lb./A + glyphosate 32 fl. oz./A

### Soybean Herbicide Programs

Can be used as a Preplant, PPI, Preemergence, or Early Post Option. For Early Post Option, use Anthem MAXX herbicide at 4 fl. oz./A plus a labeled and recommended use rate of one of the following (or similar) appropriate for the trait technology.

- Roundup PowerMAX<sup>®</sup> herbicide OR
- Liberty<sup>®</sup> herbicide OR
- Dicamba formulation(s) approved for over-the-top applications in soybeans.
- Enlist One<sup>®</sup> herbicide or Enlist Duo<sup>®</sup> herbicide
