

AT-PLANT PRODUCT PARTNERSHIP

**Give your season a strong start with proven At-Plant products.
Make the decision easier with program offerings from FMC and NACHURS.**

FMC offers a comprehensive portfolio of At-Plant crop protection technologies, that pair perfectly with NACHURS premium liquid starter fertilizers, to support seedling success. FMC portfolio products and NACHURS products are best used in combination a minimum of 0.5 inches off the seed. This includes liquid fertilizer ready (LFR) formulations designed for superior mixing and stability.

ETHOS[®] XB INSECTICIDE/FUNGICIDE

Biofungicide that forms a protective barrier on root surfaces to defend against soil pests, diseases and helps protect against damaging seedling pests like corn rootworms, wireworms, grubs and more.

CAPTURE[®] LFR[®] INSECTICIDE

Helps control seed and seedling pests such as armyworms, common stalk borer, cutworms, grubs, seedcorn maggot and wireworms. Full use rates also help provide corn rootworm control.

PREMIUM STARTER FERTILIZERS FROM NACHURS:

NACHURS premium liquid starter fertilizers are manufactured using quality raw materials to provide an agronomically efficient source of NPK. This formulation maximizes plant nutrient solubility, minimizes the salt index and equipment corrosion.

Premium Starters/Fertilizers	N (lbs. per gallon)	P (lbs. per gallon)	K (lbs. per gallon)	S (lbs. per gallon)
NACHURS imPulse [®]	1.06	1.91	.42	—
NACHURS First Down [®]	.74	1.91	.64	—

AT-PLANT PRODUCT PARTNERSHIP

NACHURS IMPULSE®

- Premium 100% orthophosphate in-furrow liquid fertilizer that contains NACHURS Bio-K technology, the most plant available source of potassium.
- Highly available phosphate and potassium promotes improved early season plant health and increased stress tolerance.
- Specially formulated for corn and wheat crops, NACHURS imPulse offers quick and uniform plant emergence which aides yield potential.

NACHURS TRIPLE OPTION®

- Adapted for use on all crops.
- Offers the flexibility for in-furrow, foliar, fertigation, and transplant applications.
- Compatible with many crop protection products and other crop technologies, aligning to promote crop yield and quality.

NACHURS FIRST DOWN®

- Helps maximizes plant nutrient solubility.
- Helps minimizes salt index.
- Helps minimize equipment corrosion.
- Allows good cold weather storage.
- Plant safe at recommended rates.

NACHURS K-FLEX®

- Designed to be blended with various fertilizer products to provide additional potassium and sulfur needed to promote high yielding crops.
- Creates a balanced starter blend that can be used as a foundation for planting in cold soils, especially in minimum or no-till environments.
- Gives growers the flexibility they need to help yield potential.

WORK WITH YOUR LOCAL NACHURS OR FMC REPRESENTATIVE FOR MORE INFORMATION.

NACHURS Bio-K is a premium source of potassium fertilizer combined with a natural plant metabolite creating the most effective and efficient source of potassium. Using Bio-K technology results in quicker germination, improved root development, and an elevated abiotic stress tolerance; this leads to better plant establishment, more vigorous growth, and higher yields.

Contact a NACHURS representative for specific recommendation on products. It is always recommended that a jar test be done when adding to other fertilizers or chemicals. Always read and follow the pesticide labels when considering tank mixing pesticides and fertilizer products.

This Xyway LFR fungicide recommendation is made as permitted under FIFRA Section 2(ee) for alternative placement at-plant in corn (field, corn grown for seed, popcorn and sweet corn) in all registered states except Texas. This recommendation has not been submitted to or approved by the EPA. The 2(ee) expiration date is 12/31/2027.

Always read and follow all label directions, precautions and restrictions for use. Some products may not be registered for sale or use in all states.
