

# Command® 3ME Microencapsulated Herbicide

Rice country's number one preemergent herbicide choice.

## Product Information:

For stopping competitive annual grasses and weeds — especially those with high potential for resistance — use the country's number one preemergence choice, Command® 3ME microencapsulated herbicide. It targets major weeds like barnyardgrass, broadleaf signalgrass, crabgrass, panicum and the sprangletop species.

Use Command 3ME microencapsulated herbicide as the foundation of your weed-control program, applying before or after planting up to the five-leaf rice growth stage. Its versatility allows application to all the rice weed control technologies on the market.

## RICE

## Quick Facts:

- Advanced microencapsulation technology protects the integrity of the herbicide under difficult conditions, so you can protect the integrity of your rice harvest.
- Longstanding industry standard for control of key annual grasses in rice.
- Convenient for tank mixing with other rice herbicide products.
- Versatility to apply preplant, at-plant or early post, up to five-leaf stage.
- Formulation reduces off-target effects and volatility.
- Moisture is required for activation of preemergence herbicides. Following application, fields should be flushed if precipitation does not occur.

## Weeds Controlled:

Barnyardgrass  
 Broadleaf Signalgrass  
 Crabgrass  
 Panicum, Fall and Texas  
 Sprangletop

## Application Timing:

Can be applied as a preemergent surface broadcast and early postemergent application. Flexible application timings - preplant thru the five-leaf rice growth stage.

## Label:

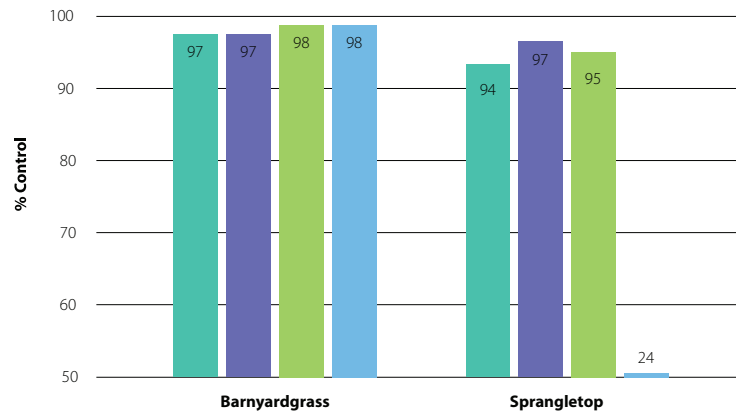

**Active Ingredient:** Clomazone (Group 13)

**Mode of Action:** Clomazone is an isoxazolidinone herbicide, which acts to inhibit pigment synthesis in the plant chloroplast as a Group 13/Group F4 herbicide. It is quickly taken up by the roots and shoots to block plant chlorophyll to control susceptible germinating seedlings before or soon after they emerge from the soil.

## Restrictions:

- Do not apply more than 34 fl. oz. (0.8 lb. ai clomazone) per acre per year.
- For aerial application, see State 24(c) labels.

**Please see label for a complete list of restrictions and buffer zone requirements.**

**Yields From Preemergent Herbicide Only (Five Year Summary, 2000-2004)**

- Command\* 3ME microencapsulated herbicide 1.1 pt/A
- Command\* 3ME microencapsulated herbicide 1.3 pt/A
- Command\* 3ME microencapsulated herbicide 1.6 pt/A
- Facet\* herbicide 75 DF 0.5 lb/A

### COMMAND 3ME MICROENCAPSULATED HERBICIDE USE RATE

SOIL TEXTURE	BROADCAST RATES PER ACRE*
Coarse (light) soils: (sand, loamy sand, sand loam)	11-14 oz. (0.25-0.33 lb. ai)
Medium soils: loam, silt, silt loam, sandy clay, sandy clay loam	17-21 oz. (0.4-0.5 lb. ai)
Fine (heavy) soils: silty clay, clay loam, silty clay loam, clay	21-34 oz. (0.5-0.8 lb. ai)
