

Ethos[®] 3D Insecticide/Fungicide

CORN/SOYBEANS

High Yield Potential Starts In-Furrow

Start the growing season with the right combination of effective control and efficient technology that helps produce healthy plants and help for higher yields. Apply Ethos[®] 3D insecticide/fungicide with the innovative 3RIVE 3D[®] application system.

Ethos 3D insecticide/fungicide is uniquely formulated to help maximize crop health and protect seedlings during critical early growth. It provides full spectrum seedling insect and disease protection for corn, soybeans, dry beans and peas, sunflowers and succulent beans and peas. Combining the proven performance of bifenthrin insecticide and a naturally occurring biofungicide, Ethos 3D insecticide/fungicide creates a protective barrier around plant roots with disease protection that continues to grow with the plant. The result helps maximize water and nutrient uptake for stronger, more vigorous crops.

Quick Facts

- Specifically formulated for use in the 3RIVE 3D application system.
- Protects seedlings At-Plant with an insecticide and a broad-spectrum biofungicide.
- Biofilm colonizes root hairs, creating a barrier against diseases that grow with plants.
- Helps maximize yield potential through robust root system for increased nutrient uptake.
- Promotes uniform emergence with increased vigor to optimize productivity.
- Long-lasting residual control.

Research & Results

Trials show robust root systems and vigorous growth for corn and soybeans. Broad-spectrum protection against insects and root diseases helps seedlings thrive. Treated plants also exhibit more fine feeder roots, which enhance nutrient uptake.

PRODUCT INFORMATION	
Active Ingredients:	Bifenthrin, <i>Bacillus amyloliquefaciens</i> strain D747
Chemistry Class:	Bifenthrin: Pyrethroids, IRAC Group 3A <i>Bacillus amyloliquefaciens</i> : FRAC Group BM 02
Formulation:	Bifenthrin: 15.67% <i>Bacillus amyloliquefaciens</i> strain D747: 5.5%

LABELED USES

<ul style="list-style-type: none"> Corn (All Types) Soybeans Dry Beans & Peas Succulent Beans & Peas Sunflowers 	<ul style="list-style-type: none"> Corn Rootworms Wireworms Cutworms Grubs Seedcorn Maggots Armyworms Stalk Borers 	<ul style="list-style-type: none"> <i>Pythium</i> <i>Phytophthora</i> <i>Fusarium</i> <i>Rhizoctonia</i>

Commercial Field, Dayton OH, 2018

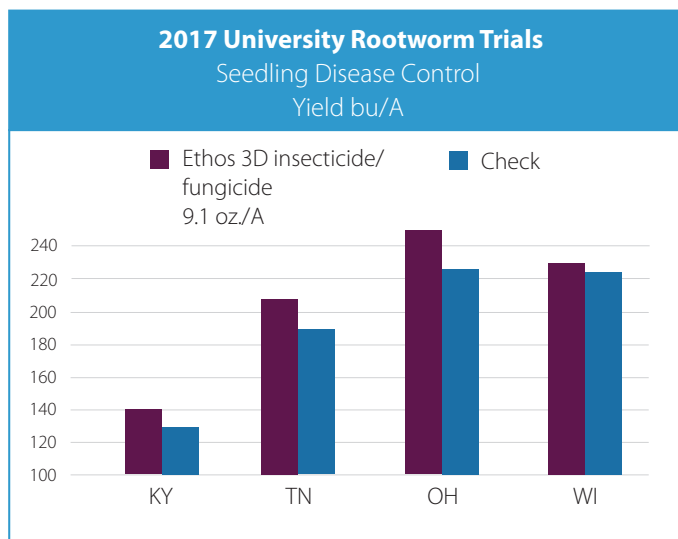

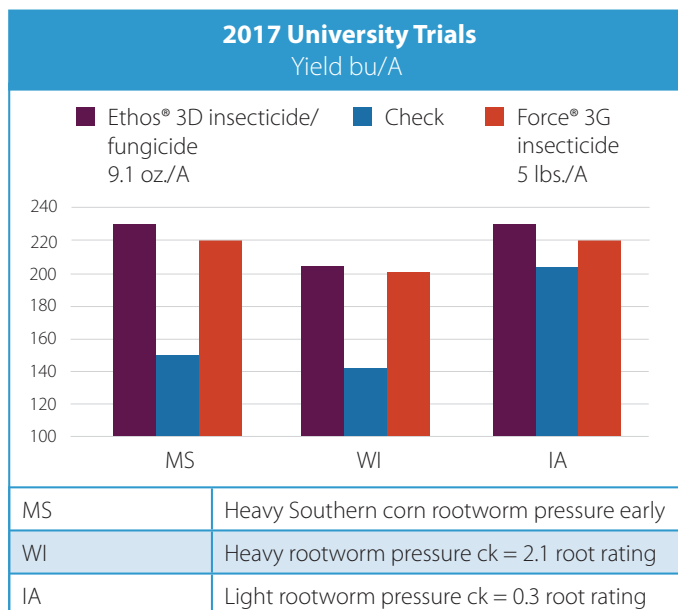

Untreated

Ethos 3D insecticide/fungicide

The plants treated with Ethos 3D insecticide/fungicide reached canopy quicker, providing better weed control earlier in the season.
