

Lucento® Fungicide

CORN

Best-in-class performance on key corn diseases that preserves yield potential.

Powered by a novel premix of active ingredients from FMC, new Lucento® fungicide provides an exclusive combination of benefits for smart disease protection and high yielding performance against the toughest diseases in corn. Lucento fungicide's unique mobility throughout the plant defends against and controls threatening diseases like gray leaf spot and Northern corn leaf blight, resulting in greener fields and higher yields. It can be used to reduce the dependence on other important fungicides, like strobilurins, as part of a disease resistance management plan.

Product Information:

Active ingredients: Bixafen (succinate dehydrogenase inhibitors, FRAC Group 7), flutriafol (demethylation inhibitors, FRAC Group 3)

Benefits of Lucento Fungicide:

- Field studies have shown it outperforms competitors like Headline AMP® fungicide on yields under heavy disease pressure.
- Only premix of proven SDHI, bixafen, and FMC-patented flutriafol active ingredients.
- Preventive and curative control of Southern rust, gray leaf spot and Northern leaf blight.
- Alternative mode of action reduces dependence on strobilurins and helps manage resistance risk.
