

XYWAY™ 3D FUNGICIDE

SOIL-APPLIED DISEASE PROTECTION FROM DAY ONE

QUICK FACTS

- Season-long, inside-out disease protection for outstanding yield, stalk health and standability.
- Available for application exclusively with the revolutionary 3RIVE 3D® application system.
- Foliar disease protection from grey leaf spot and Northern corn leaf blight.

ACTIVE INGREDIENT: FLUTRIAFOL

- Long residual activity, providing disease protection throughout the season.
- Systemic movement to provide disease control throughout the plant.
- Unmatched residual activity and translocation abilities.

3RIVE 3D APPLICATION SYSTEM

The 3RIVE 3D application system from FMC is a revolutionary way to deliver in-furrow protection for seedling defense and yield enhancement. Xyway 3D fungicide is available for application exclusively through the 3RIVE 3D application system.

- Allows growers to maximize their efficiency. One tank protects up to 480 acres while using 90% less water than traditional liquid systems and carrying 50% less weight than granular systems.
- Fewer refills and less weight translates to consistent high-speed coverage.
- Designed with convenience in mind, this system combines the right amount of product and water, minimizing measuring and eliminating the need for mixing and tank agitation.

APPLICATION GUIDELINES (BASED ON 30" ROW SPACING)

Program	Disease Pressure	Rate
Planting Only	Light to Moderate	Xyway 3D fungicide at 11.2 fl. oz./A
Planting and Foliar Protection	Heavy	Xyway 3D fungicide at 5.8 fl. oz./A fb Lucento® fungicide at 5 fl. oz./A applied in R1-R3 stage
