AIM® EC HERBICIDE
HOODED SPRAY APPLICATIONS

HOODED SPRAY APPLICATIONS FOR FAST ACTIVITY, MORE COMPLETE BURNDOWN AND CONTROL OF TOUGH BROADLEAF WEEDS.

BROADLEAF WEED CONTROL

Hooded or Directed Sprays

Use Rates: 1.0 – 2.0 fl. oz./A

Tank-Mix Recommendations:
- Glyphosate 24 – 48 fl. oz. or Gramoxone Inteon™ 1.3 – 2.0 pts.
- Residual herbicides may also be used according to their labels.
- Do not drift spray mixture on desirable vegetation, green bark, vegetative parts or desirable fruit.
- Target 4” or less weeds for optimum control.
- Always add an adjuvant according to the adjuvant guidelines.
- Use a minimum of 20 gallons finished spray per acre.

APPLICATION GUIDELINES

- 35 GPA recommended, especially when weed populations are high, or weed size is large, over 6”.
- Use nozzles and spray systems designed for maximum weed coverage with low spray drift.
- Aim® EC herbicide is rainfast within one hour of application.

ADJUVANT GUIDELINES

- COC at 1% v/v is recommended under dry conditions, heavy weed pressure or MSO and silicone combinations.
- NIS may be used at 0.25% for all crops.
- Add AMS/UAN and or water conditioner.

TECHNICAL INFORMATION

- Active Ingredient: Carfentrazone-ethyl
