Knock down a broad spectrum of challenging pests with the lasting residual of Elevest™ insect control. By maximizing the ratio of ingredients Rynaxypyr® active and bifenthrin, growers get better overall control.

This convenient, fully loaded combination can be applied late in the season to help protect cotton yields and quality. Elevest insect control provides excellent simultaneous control of Bt-resistant bollworms, stink bugs and plant bugs.

Elevest insect control is rainfast when dry and is easy to mix and clean out of tanks. It has excellent compatibility with commonly used tank-mix partners labeled for use on cotton, including insecticides, fungicides, herbicides, foliar fertilizers and adjuvants.

**Product Information:**

- Enhances and protects cotton yields when used on two- and three-gene Bt cotton varieties that are facing resistant bollworms.
- Provides excellent control of a broad spectrum of more than 25 pests faced by cotton growers, including bollworms, stink bugs and plant bugs.
- Allows growers to select cotton varieties that offer optimum lint potential and are best suited for the land.
- Contains maximum active ingredient ratio of industry-leading Lepidopteran active, Rynaxypyr (Group 28), with the fast knockdown of superior pyrethroid, bifenthrin (Group 3A), for broad spectrum and better overall control.
- Provides fast knockdown of targeted pests.
- Rainfast when dry.
- Broad-spectrum control with lower risk for mite flares.*

**Quick Facts:**

- Except for locations where mite resistance to bifenthrin exists.
**TARGET PESTS | APPLICATION RATE (fl. oz./A) | PHI (Days) | REI (Hours)**
---|---|---|---
Bollworms, Plant bugs** | 5.6-9.6 | | |
Stink bugs** | 4.8-9.6 | | |

**Some species that are normally difficult to control or may have developed some level of resistance to pyrethroids require a higher rate range of 7.7 – 9.6 fl. oz./A (0.134 – 0.167 lb. ai/A), tank mixing with another insecticide or may only be labeled at 9.6 fl. oz./A. See federal label for specific rates for each pest.**

**Efficacy of Elevest™ insect control on bollworms (Helicoverpa zea) in cotton.**
Mean across four trials (5-8 DAT), six trials (9-14 DAT) or five trials (15-21 DAT) conducted in 2019 in Texas, Arkansas, Louisiana, Mississippi, North Carolina and Tennessee.

**Active Ingredients:**
Bifenthrin, Group 3A
Chlorantraniliprole, Group 28
