

XYWAY BRAND FUNGICIDES BENEFITS

FMC is confident in the performance of Xyway™ brand fungicides, a game-changing approach to foliar disease management and season-long benefits growers can see in corn. The introduction of Xyway 3D fungicide and Xyway LFR® fungicide revolutionizes how farmers approach disease management by providing foliar disease protection equivalent to a traditional VT/R1 fungicide application from an at-plant application of a Xyway brand fungicides. The highly systemic and long residual activity of Xyway brand fungicides protect the plant and reduce disease infection levels from the lower canopy to the top of the plant. This systemic, inside-out protection reduces the associated stresses leading to stronger roots, healthier stalks and foliar disease protection against some of the greatest yield-limiting diseases that challenge corn from germination through the grain fill period.

PROGRAM DESCRIPTION: (Includes field corn, popcorn. Excludes seed corn, sweet corn.)

If an application of Xyway 3D fungicide or Xyway LFR fungicide applied at the use rates specified in the program below does not maintain a minimum of 80% reduction in foliar diseases (*reduction of whole plant severity versus a non-treated check*) listed on the respective Xyway 3D fungicide or Xyway LFR fungicide product labels through the R4 stage (prior to beginning dent) in corn, FMC will pay up to \$12 per acre towards a foliar fungicide for application to be applied to corn at VT/R1 stage or later.

Qualifying Product	Assurance Measurement*	Minimum Application Rate	Application Timing	Program Payment
Xyway 3D fungicide OR Xyway LFR fungicide	80% reduction in gray leaf spot, Northern corn leaf blight, Southern corn leaf blight, common rust, head smut, common smut through R4 stage (dough) in corn.	Xyway 3D fungicide @ 0.68-0.86 fl. oz./1000' (11.8 oz./A 30-inch row) OR Xyway LFR fungicide @ 0.87-1.1 fl. oz./1000' (15.2 fl. oz./A 30-inch row)	At-Planting: In-furrow or 2x2 inch placement**	Up to \$12/A for foliar treatment of fungicide at VT/R1 or later stage corn to maintain disease control.

** Modifications of in-furrow or 2x2 inch placement may be acceptable for Xyway LFR fungicide at-plant applications. Talk to your local FMC representative for more information or with questions regarding Xyway LFR fungicide applications and placement requirements.

- Apply Xyway LFR fungicide at minimum of 5 gallons per acre (gpa) of carrier (fertilizer or water).
- For Xyway 3D fungicide applications, follow the directions for proper 3RIVE 3D® applications.

2021 XYWAY™ 3D Fungicide Or XYWAY™ LFR® Fungicide Disease Protection Assurance

PROGRAM QUALIFICATIONS

- Xyway 3D fungicide or Xyway LFR fungicide must be applied in-furrow, or near the row in a 2x2, or dual placement 2x2 or similar-type soil application at planting time at rates specified above. Reduced or rates below recommendations are not covered under this assurance program.
- Only diseases listed on the Xyway 3D fungicide or Xyway LFR fungicide labels are covered with this assurance program. Late planted or corn planted after the local full insurance planting deadline date is not eligible for this program.
- A reduction of 80% or less in whole plant disease severity will be based on evaluation of the average reduction in disease levels and overall improvement of health across the entire plant.
- To make a claim under this assurance program, the need for and an application of a foliar application of a fungicide must be applied at VT stage or later with documentation the application was made. If no foliar application is made, no claim/payment can be made under this assurance program.
- **An authorized FMC representative must be notified of a claim prior to the established deadline and have a reasonable opportunity to inspect the field prior to a foliar fungicide application being made.** The authorized FMC representative must confirm the inadequate performance of the Xyway fungicide applied before any claim can be made under this program. Action taken without prior FMC knowledge or opportunity to inspect the field(s) in question will not be eligible for payment under this program.

Treated vs. Untreated Comparison Requirements

- *An untreated strip/check area representative of the field must be available for comparison to determine the level of performance of the Xyway 3D fungicide or Xyway LFR application. The treated and untreated check comparisons must be located within the same field. The untreated check area cannot have any foliar fungicides applied during the program period in order to maintain a useful comparison. All other agronomic factors must be the same in both the untreated check and treated areas, including but not limited to fertility programs, irrigation, soil type and corn hybrid.

PROGRAM REQUIREMENTS

1. A representative check strip or area is required for comparison to determine the level of performance of the Xyway fungicide application. A side-by-side comparison in the same field is the best to maintain similar topography, soil type and agronomic conditions for accurate comparison.
2. Use identical seed varieties/hybrids, fertility, tillage, seeding rate and weed control programs in all comparison check strips.
3. Products must be applied according to label use directions.

Program Period:	January 1, 2021 to September 15, 2021
Program Geography:	U.S. states where Xyway 3D fungicide or Xyway LFR fungicide is registered.
Program Claim Deadline:	September 15, 2021
Program Payment Date:	Approximately 30 days after claim approval.

2021 XYWAY™ 3D Fungicide Or XYWAY™ LFR® Fungicide Disease Protection Assurance

PROGRAM RULES & CONDITIONS

1. FMC reserves the right to change any or all features of this program at any time.
2. Assurance benefit is for product costs only. Application and other related costs are excluded from assurance payments.
3. An authorized FMC representative must be notified of a claim prior to the established deadline and have a reasonable opportunity to inspect prior to any additional product applications. The authorized FMC representative must confirm inadequate product performance.
4. Proof of purchase is required. Only FMC branded products purchased from FMC authorized distributors or retailers for resale to growers and reported by approved reporting methods are eligible for payment under this program.
5. FMC reserves the right to audit all claims. Misreported sales of any type are a clear violation of this program and will be subject to audit and possible forfeiture of any and all program benefits.
6. FMC is in no way liable or responsible for any grower failure to pay the retailer.

To learn more visit ag.fmc.com, call your local FMC representative or our Customer Service Center at (800)346-0833.

Always read and follow all label directions, precautions and restrictions for use. Some products may not be registered for sale or use in all states. Xyway™ 3D and Xyway LFR fungicides may not be registered for sale or use in all states. Contact your local FMC retailer or representative for details and availability in your state.
