

Capture® 3RIVE 3D® Insecticide

CORN/SOYBEANS

Protect and Plant in One Pass:

Capture® 3RIVE 3D® insecticide combines proven insect control, innovative formulation and precise low-volume application in one convenient system. Products formulated for the 3RIVE 3D application system distribute active ingredients consistently and evenly throughout the applied solution for better crop protection than traditional liquids.

Capture 3RIVE 3D insecticide helps seed traits go further by creating a precise Zone of Protection™ against pests in-furrow. Plant and protect in one pass using less water while traveling at your desired planter speed. Results include increased plant stands, healthier roots and high yield potential.

Quick Facts

- Specifically formulated for use in the 3RIVE 3D application system.
- Optimize root system protection to enable better nutrient uptake.
- Three-dimensional expanding formulation protects seeds from insect damage.
- Additional layer of defense helps seed traits go further.
- Less root damage translates to healthier, more productive crops.

Product Information:

Active Ingredient:

Bifenthrin

Chemistry Class:

Bifenthrin: Pyrethroids IRAC Group 3A

Formulation:

Bifenthrin: 17.68%

LABELED USES	
Crops	Pests
Corn (All Types) Soybeans Dried beans and peas	Corn rootworm larvae
	Wireworm
	Grubs
	Seedcorn maggot
	Root aphids
	Army cutworm
	Stalkborer
	Seedcorn beetle
	Sugarcane beetle
	Root maggot

CAPTURE® 3RIVE 3D® INSECTICIDE MEETS GROWERS' PERFORMANCE DEMANDS

Root ratings indicate insect protection, but only tell part of the story. Overall plant health associated with lack of insect penetration, including reduced opportunity for disease entry, leads to increased stand and more productive plants.

32 university field trials, 2014 - 2016, IA, IL, KS, NE, MN, SD, WI.

University trials confirm Capture 3RIVE 3D insecticide's performance.

- Granular insecticides provide reliable protection and proven yields.
- 3RIVE 3D technology provides exceptional performance in an easy-to-use central-fill system without the labor and handling of granular systems.

12 university field trials, 2015 & 2016, NE, MN, MO, WI.

"I got tired of having to load the boxes all the time. When you have a 24-row planter, loading the 24, 50-pound insecticide boxes is a lot of work. This system is way easier to use, and I can cover more than 300 acres with one fill."

Mike Case, Martinsville, Indiana.
